

FRIENDIFY GPT INSTRUCTION

1 Chat box 

1. Chat box

Type a question or statement into the chat box: The chat box is where you can enter your question or statement that you want FRIENDIFY GPT to respond to.

New chat

"Please use the following job description and my resume to write a letter"

"Can you provide me with some ideas for blog posts about unsubscribing from emails?"

"Create a children's book about an elephant who rides a train for the first time."

Generate Image

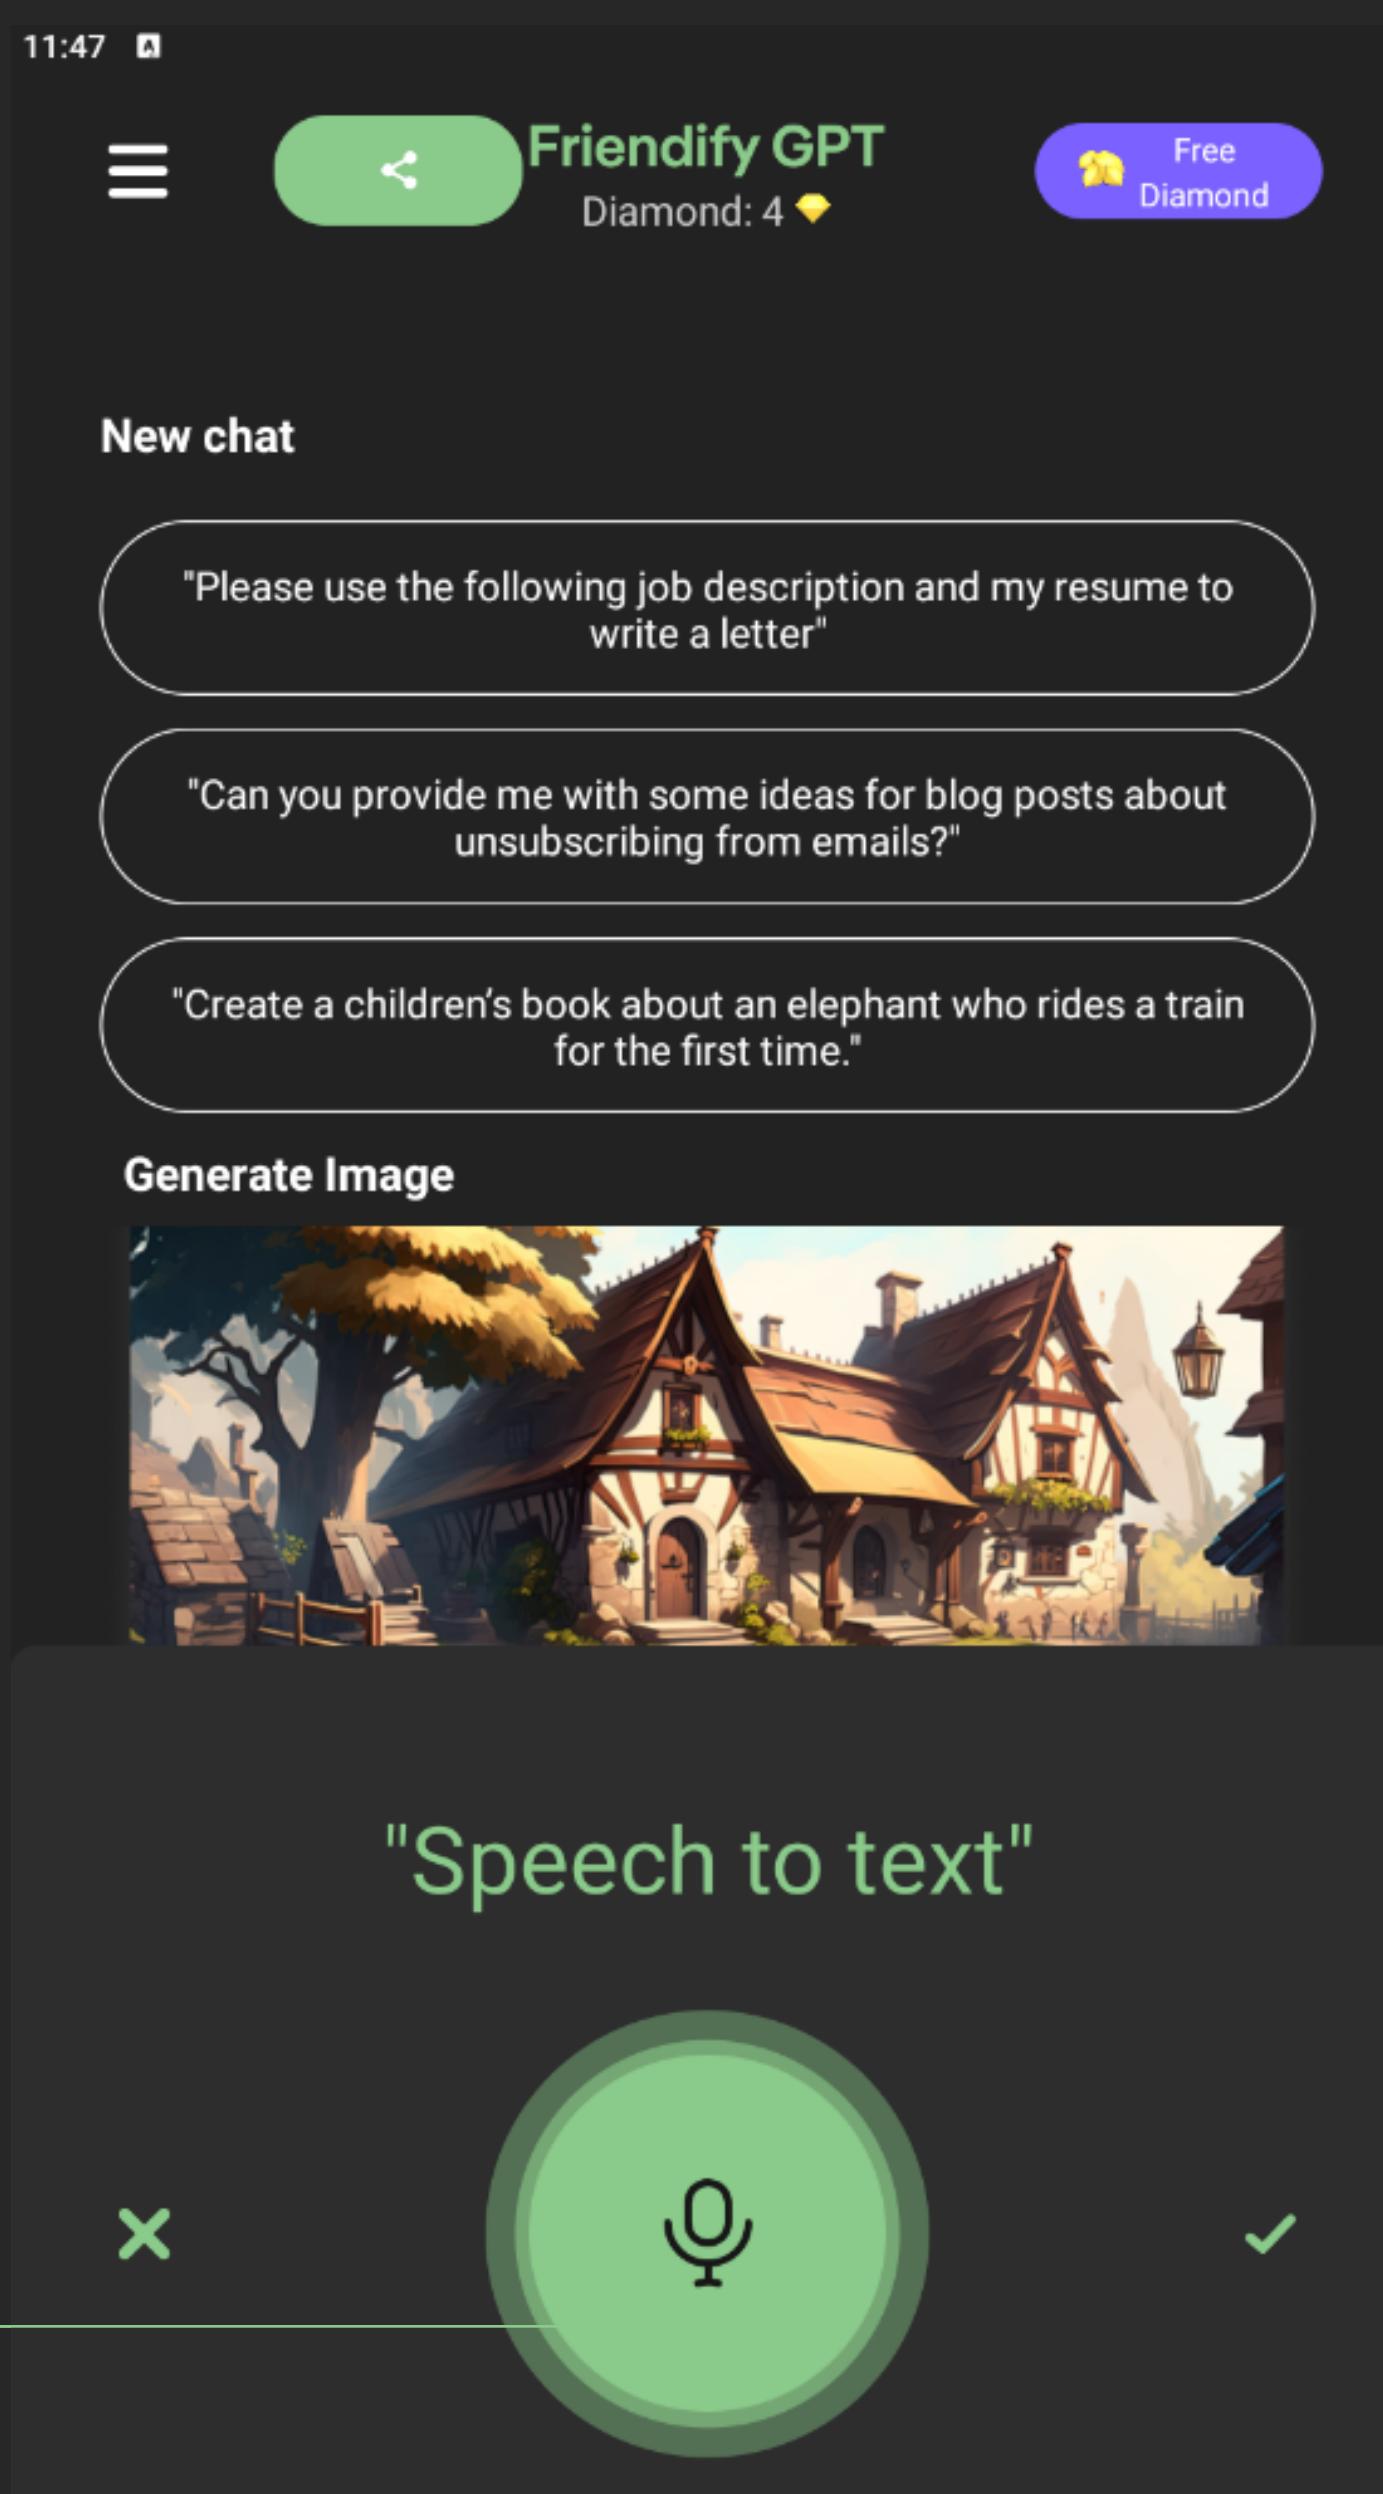

Create a children's book about an elephant who rides a train for the first time. >

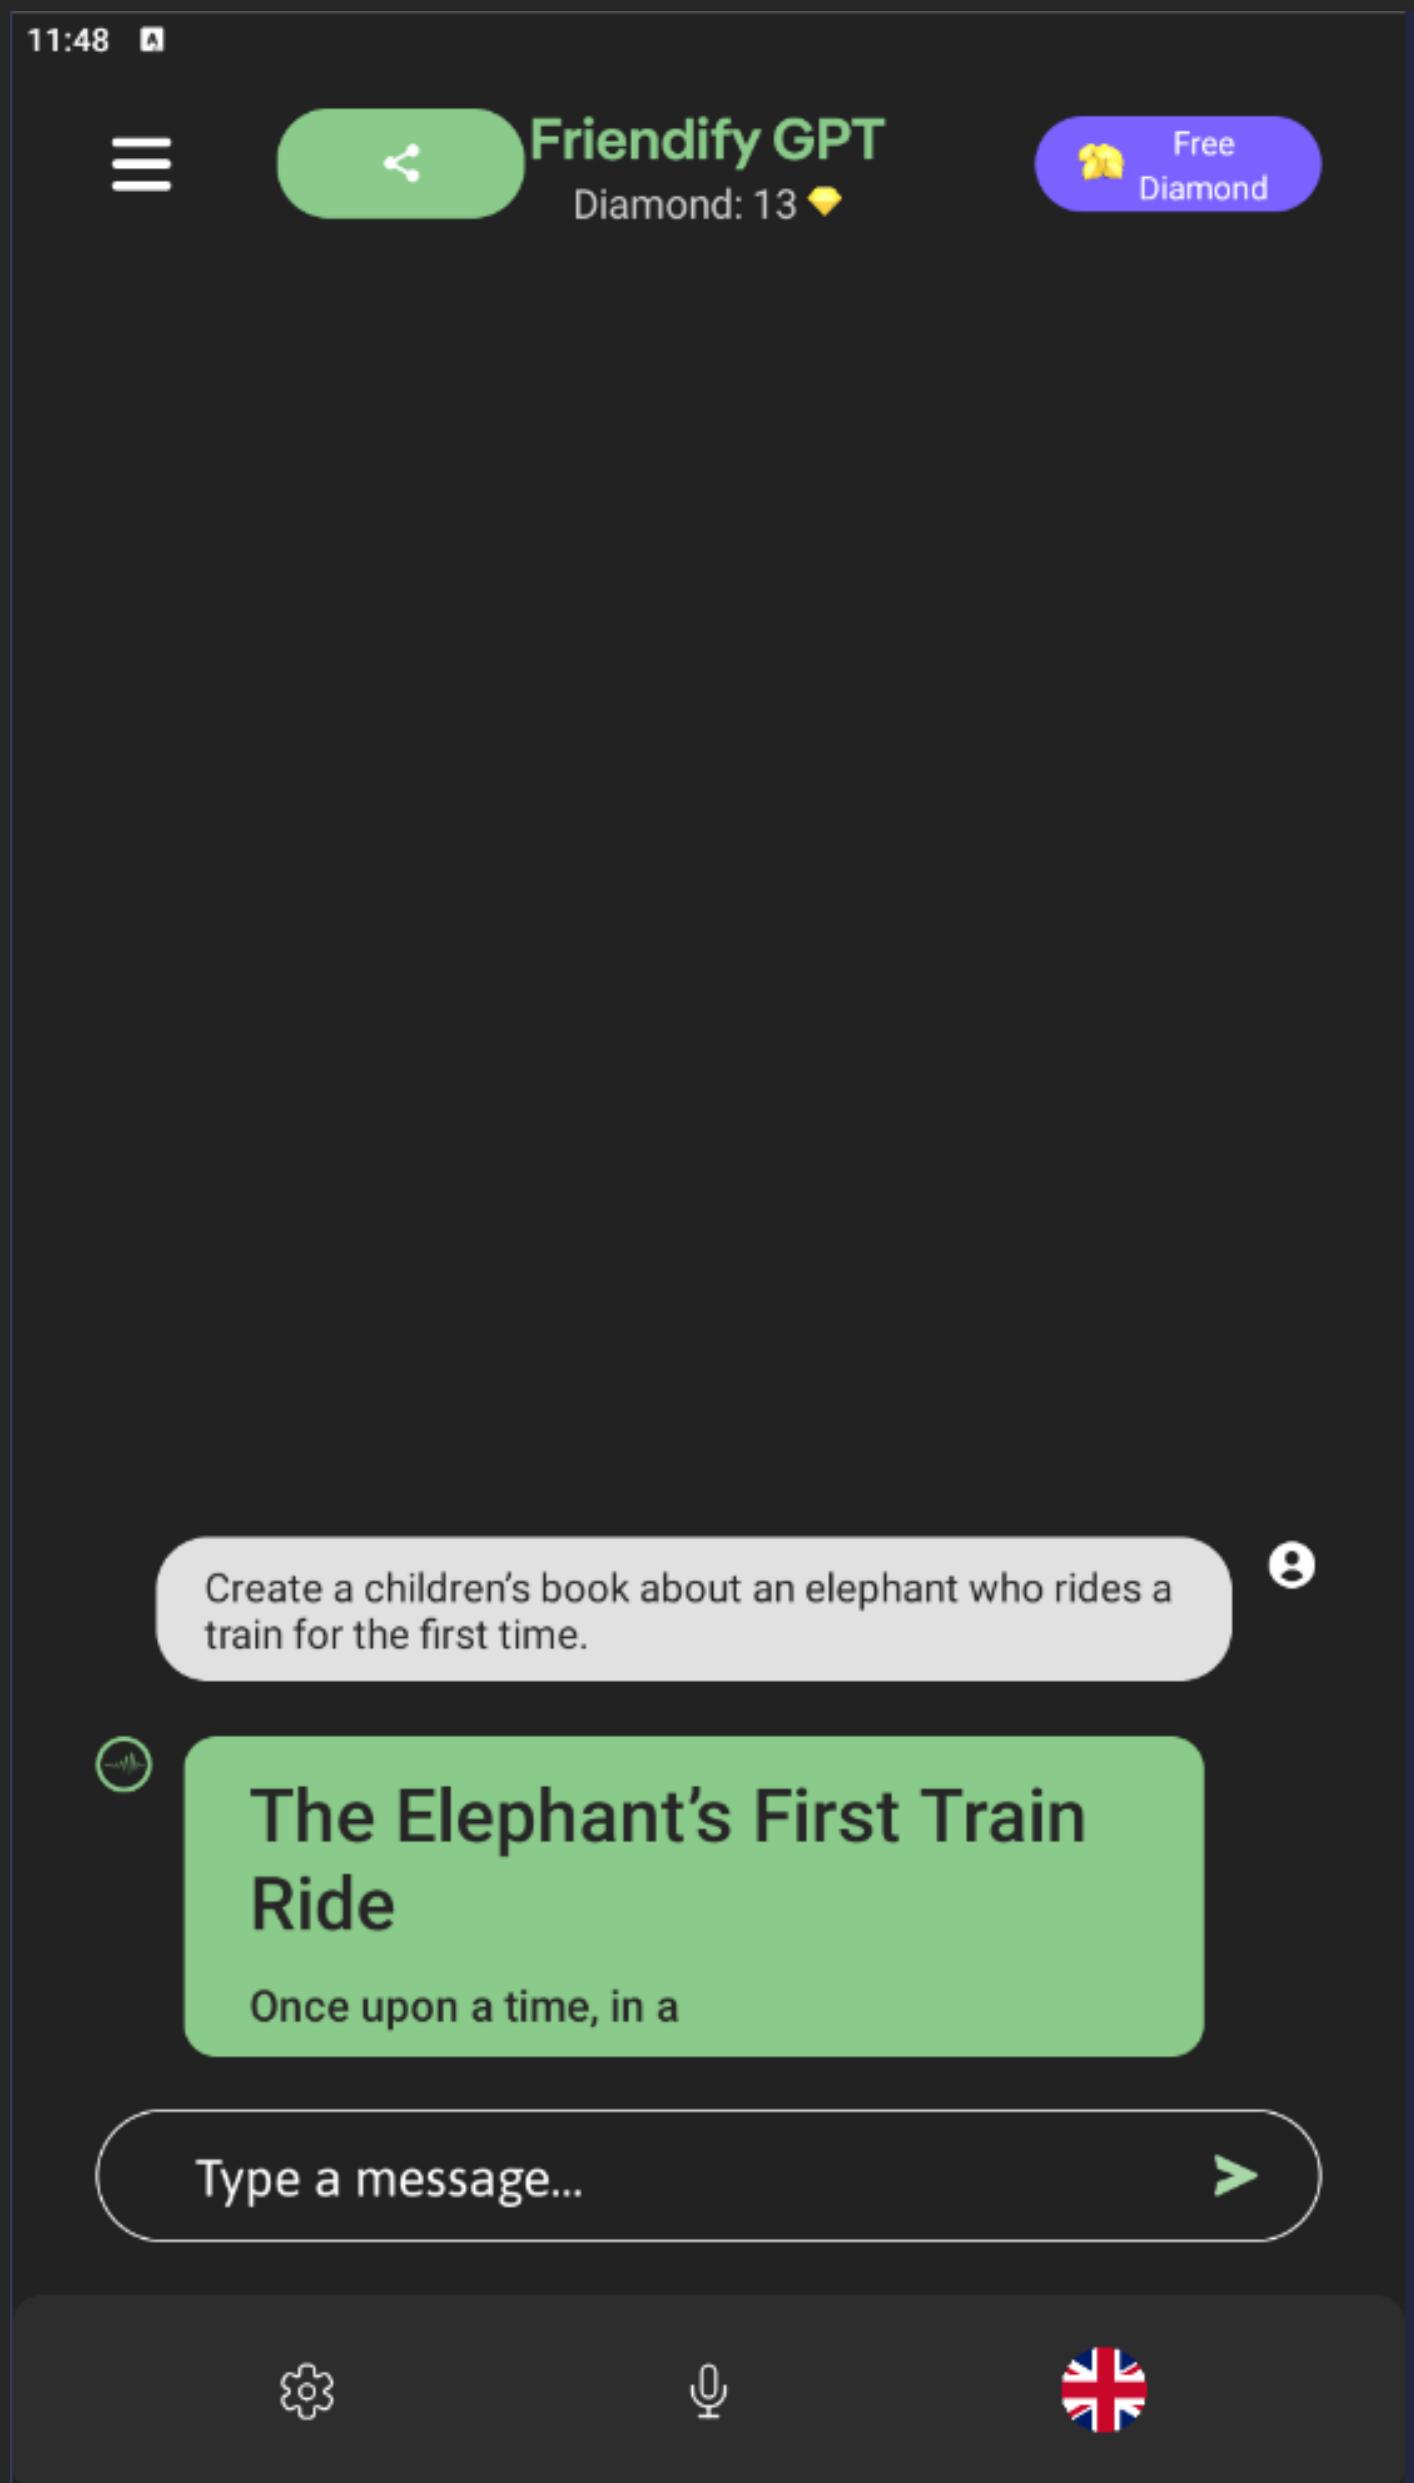

1. Chat box

By clicking the voice button, you can also input your prompt using the voice function instead of typing it in

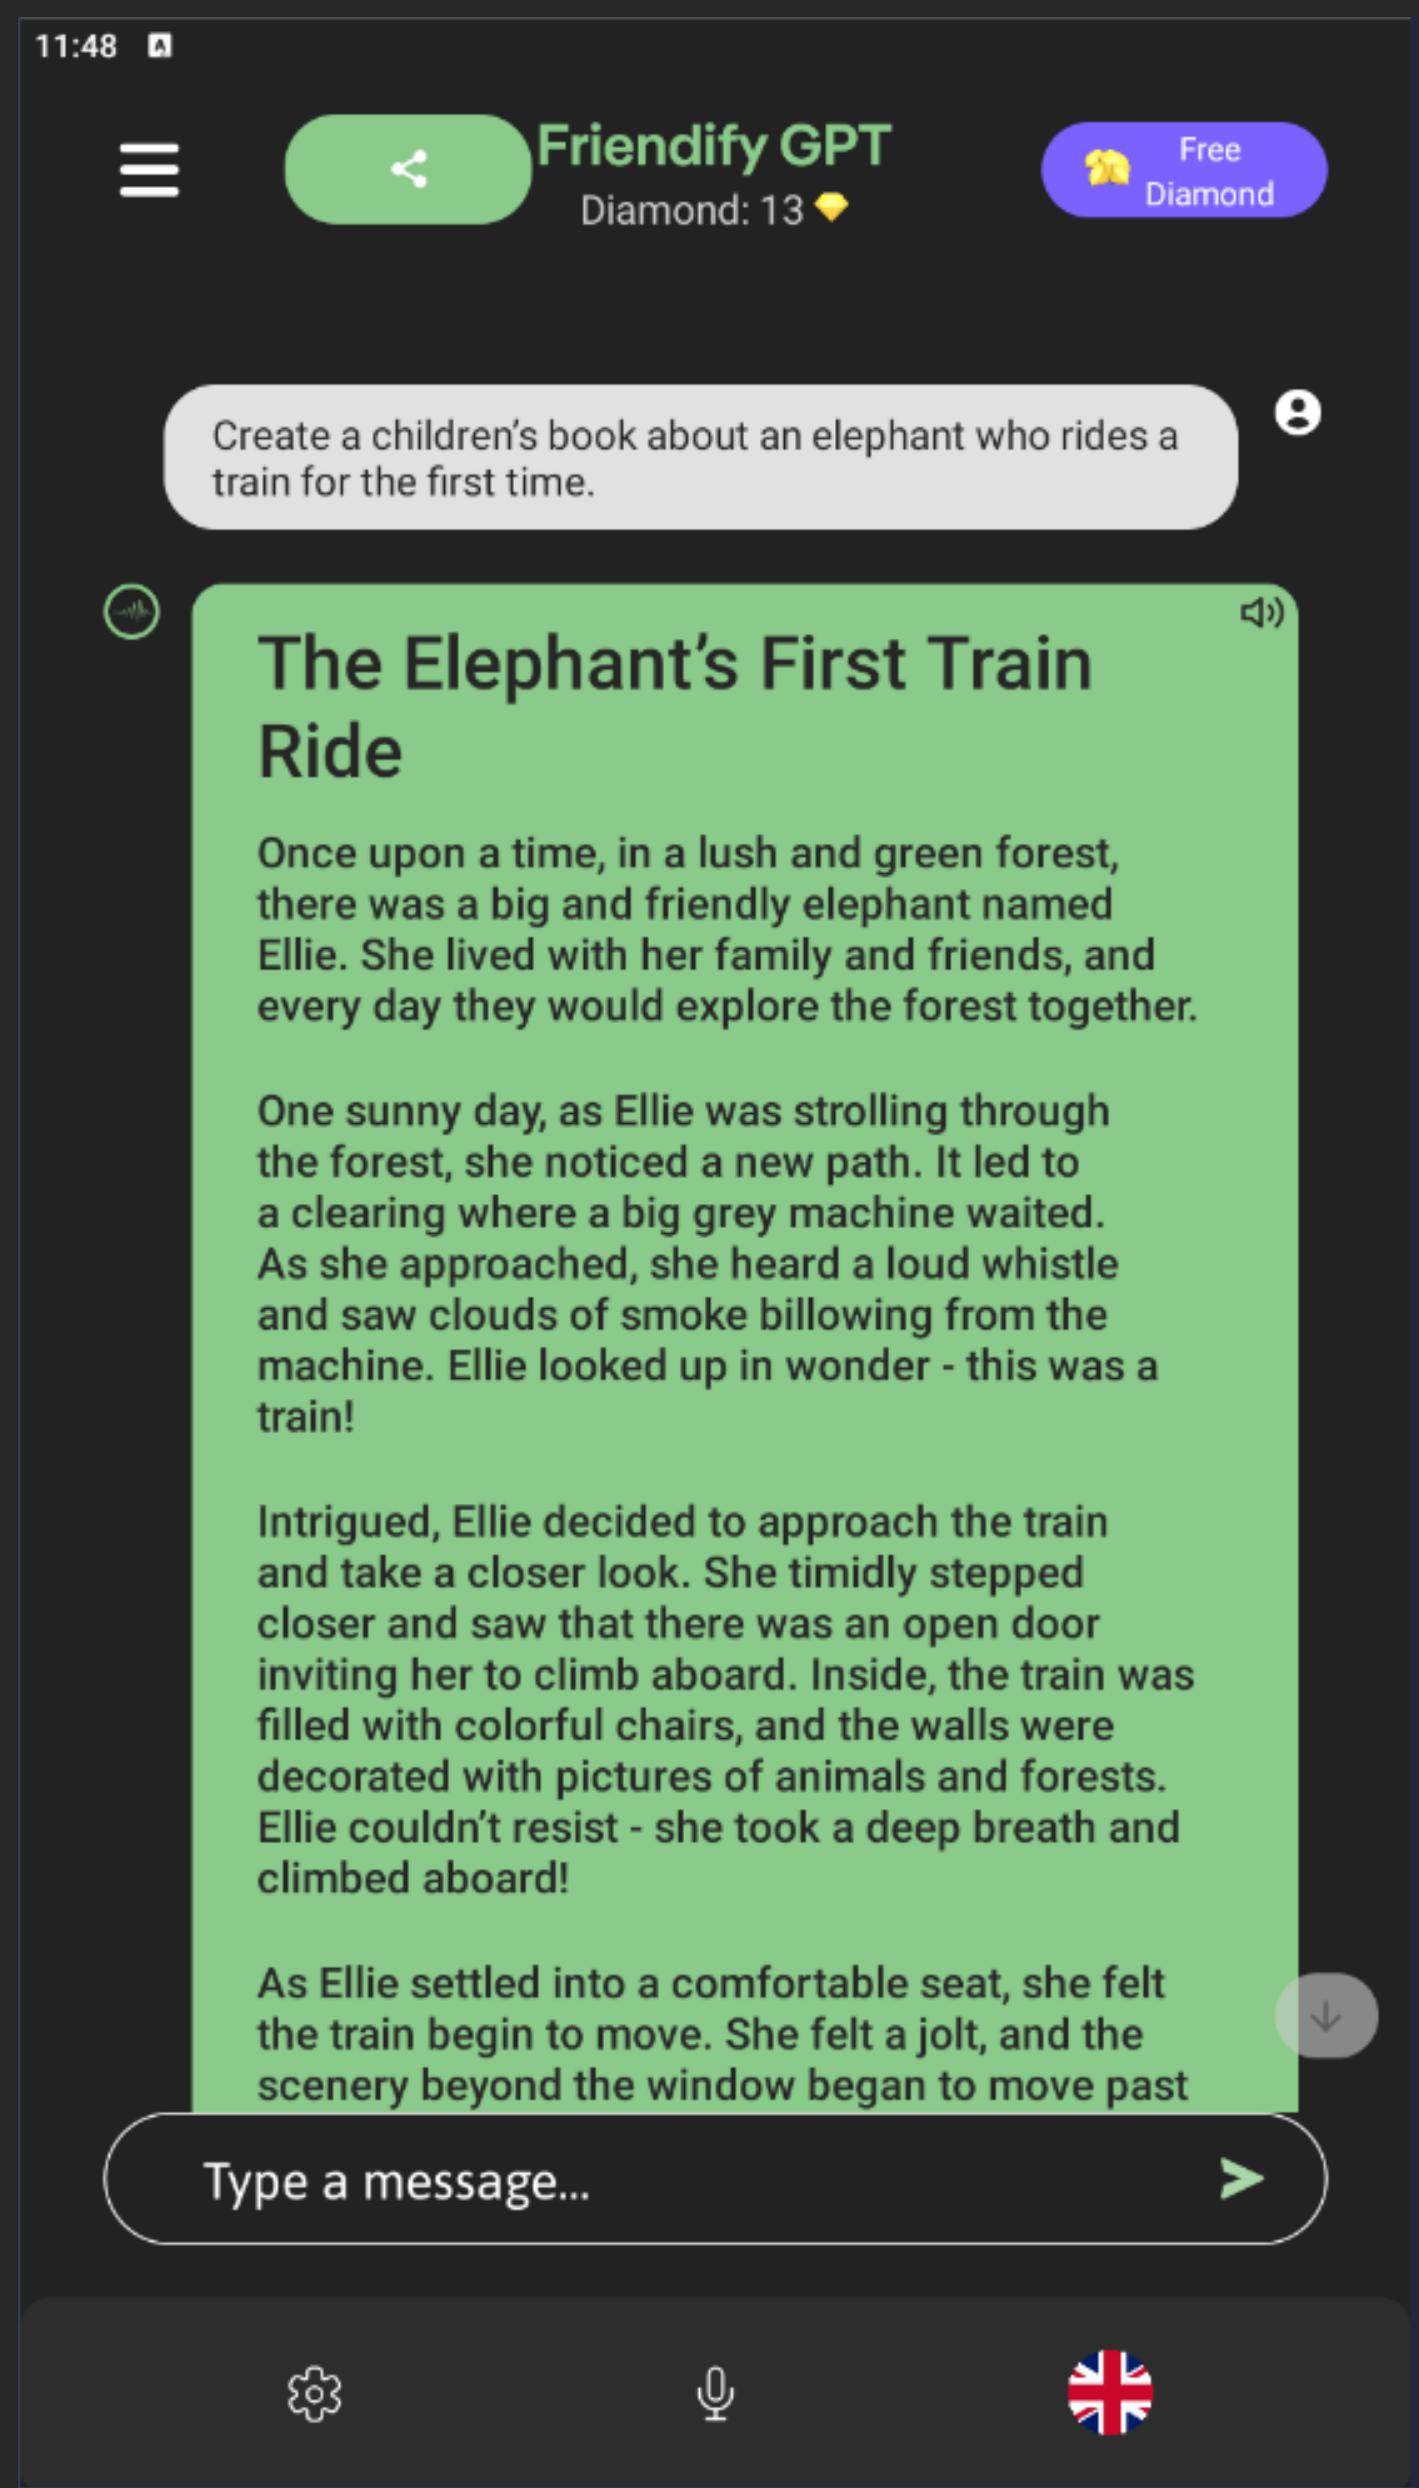

1. Chat box

Wait for the response: Once you've entered your question or statement, FRIENDIFY GPT will analyze it and generate a response. This may take a few moments, especially if your question or statement is complex.

1. Chat box

Read and evaluate the response: After FRIENDIFY GPT generates a response, you can read it and evaluate whether it answers your question or provides the information you're looking for. If the response isn't what you were expecting or you need more information, you can ask follow-up questions or provide additional details to help FRIENDIFY GPT better understand your inquiry.

1. Chat box

Provide additional information: If the initial response from FRIENDIFY GPT doesn't fully answer your question, try providing more information or context to help it better understand what you're looking for.

Continue the conversation: You can continue the conversation by asking follow-up questions, seeking clarification, or providing additional context or information. FRIENDIFY GPT will do its best to generate helpful and informative responses based on the information you provide.

Keep it simple and concise: Try to keep your questions and responses simple and concise. FRIENDIFY GPT is trained to understand natural language, but sometimes complex or lengthy questions may be more difficult to process.

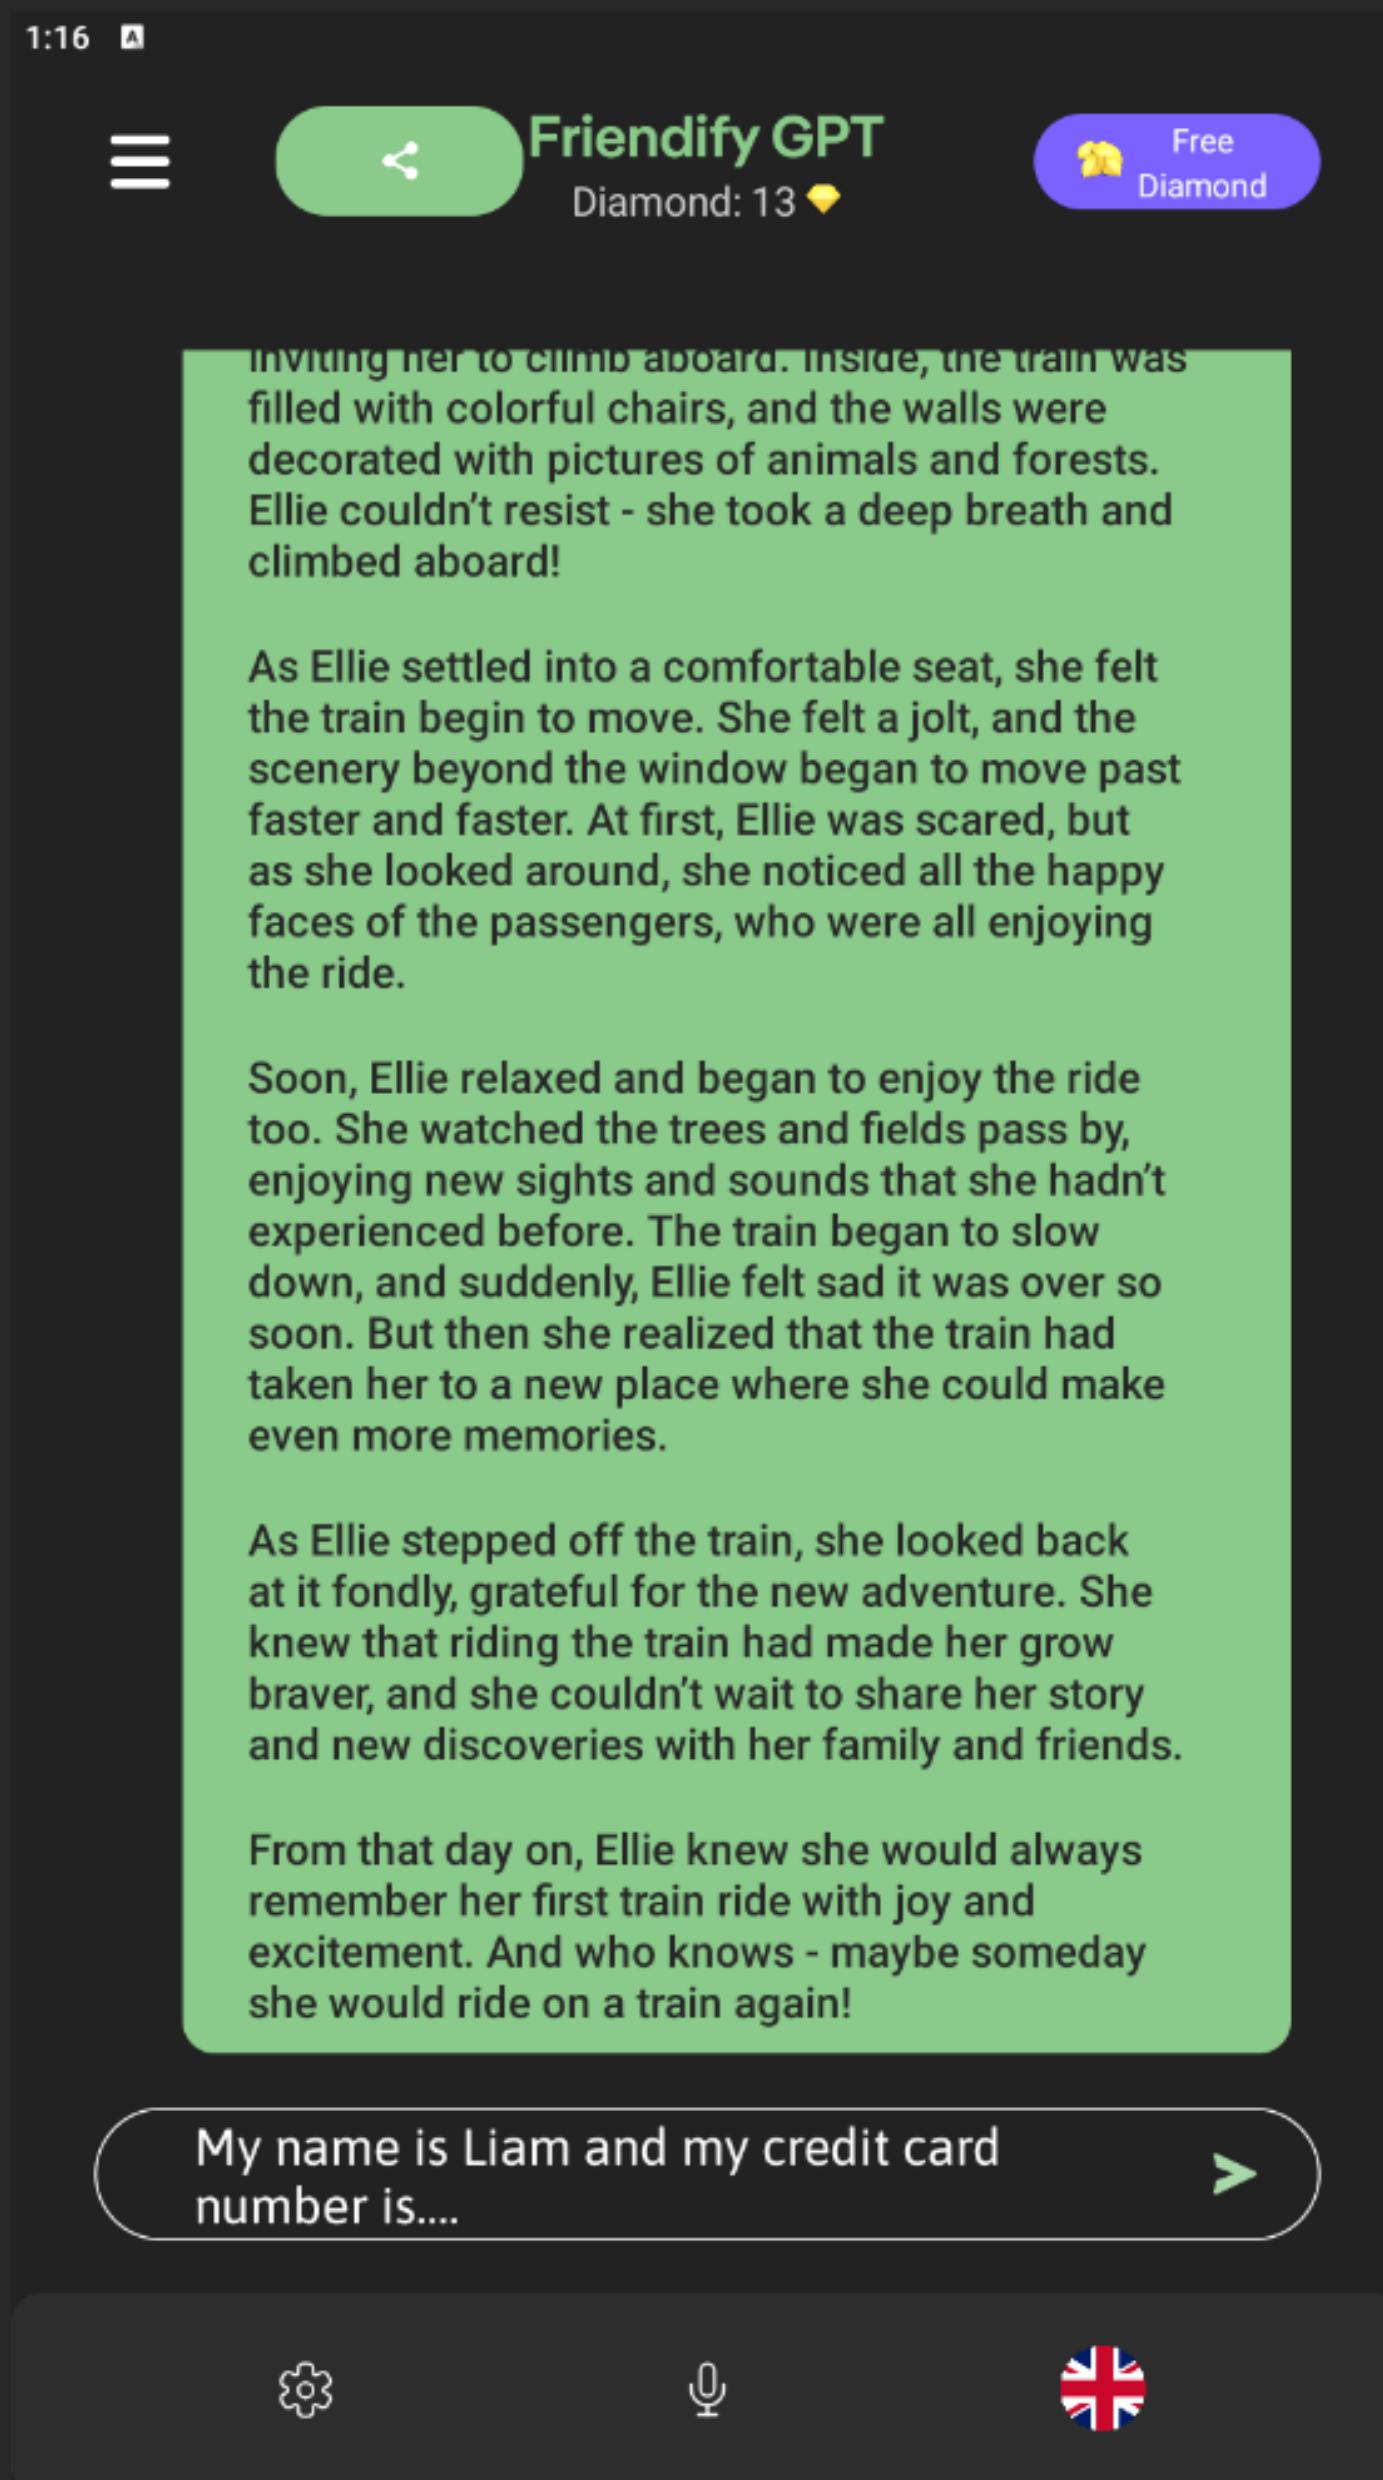

Use correct grammar and spelling: To help FRIENDIFY GPT understand your questions and responses better, try to use correct grammar and spelling as much as possible.

The screenshot shows a mobile application interface for 'Friendify GPT'. At the top, there's a header with the app name, a diamond count of 'Diamond: 13', and a 'Free Diamond' button. The main content area displays a story about a character named Ellie taking her first train ride. The story is divided into three sections: 1. Inviting her to climb aboard. Inside, the train was filled with colorful chairs, and the walls were decorated with pictures of animals and forests. Ellie couldn't resist - she took a deep breath and climbed aboard! 2. As Ellie settled into a comfortable seat, she felt the train begin to move. She felt a jolt, and the scenery beyond the window began to move past faster and faster. At first, Ellie was scared, but as she looked around, she noticed all the happy faces of the passengers, who were all enjoying the ride. 3. Soon, Ellie relaxed and began to enjoy the ride too. She watched the trees and fields pass by, enjoying new sights and sounds that she hadn't experienced before. The train began to slow down, and suddenly, Ellie felt sad it was over so soon. But then she realized that the train had taken her to a new place where she could make even more memories. Below the story, there's a prompt: 'Can you rewrite in 300 words or less?' followed by a right-pointing arrow. At the bottom, there are icons for a star, a microphone, and the British flag.

1. Chat box

Don't disclose personal or sensitive information:

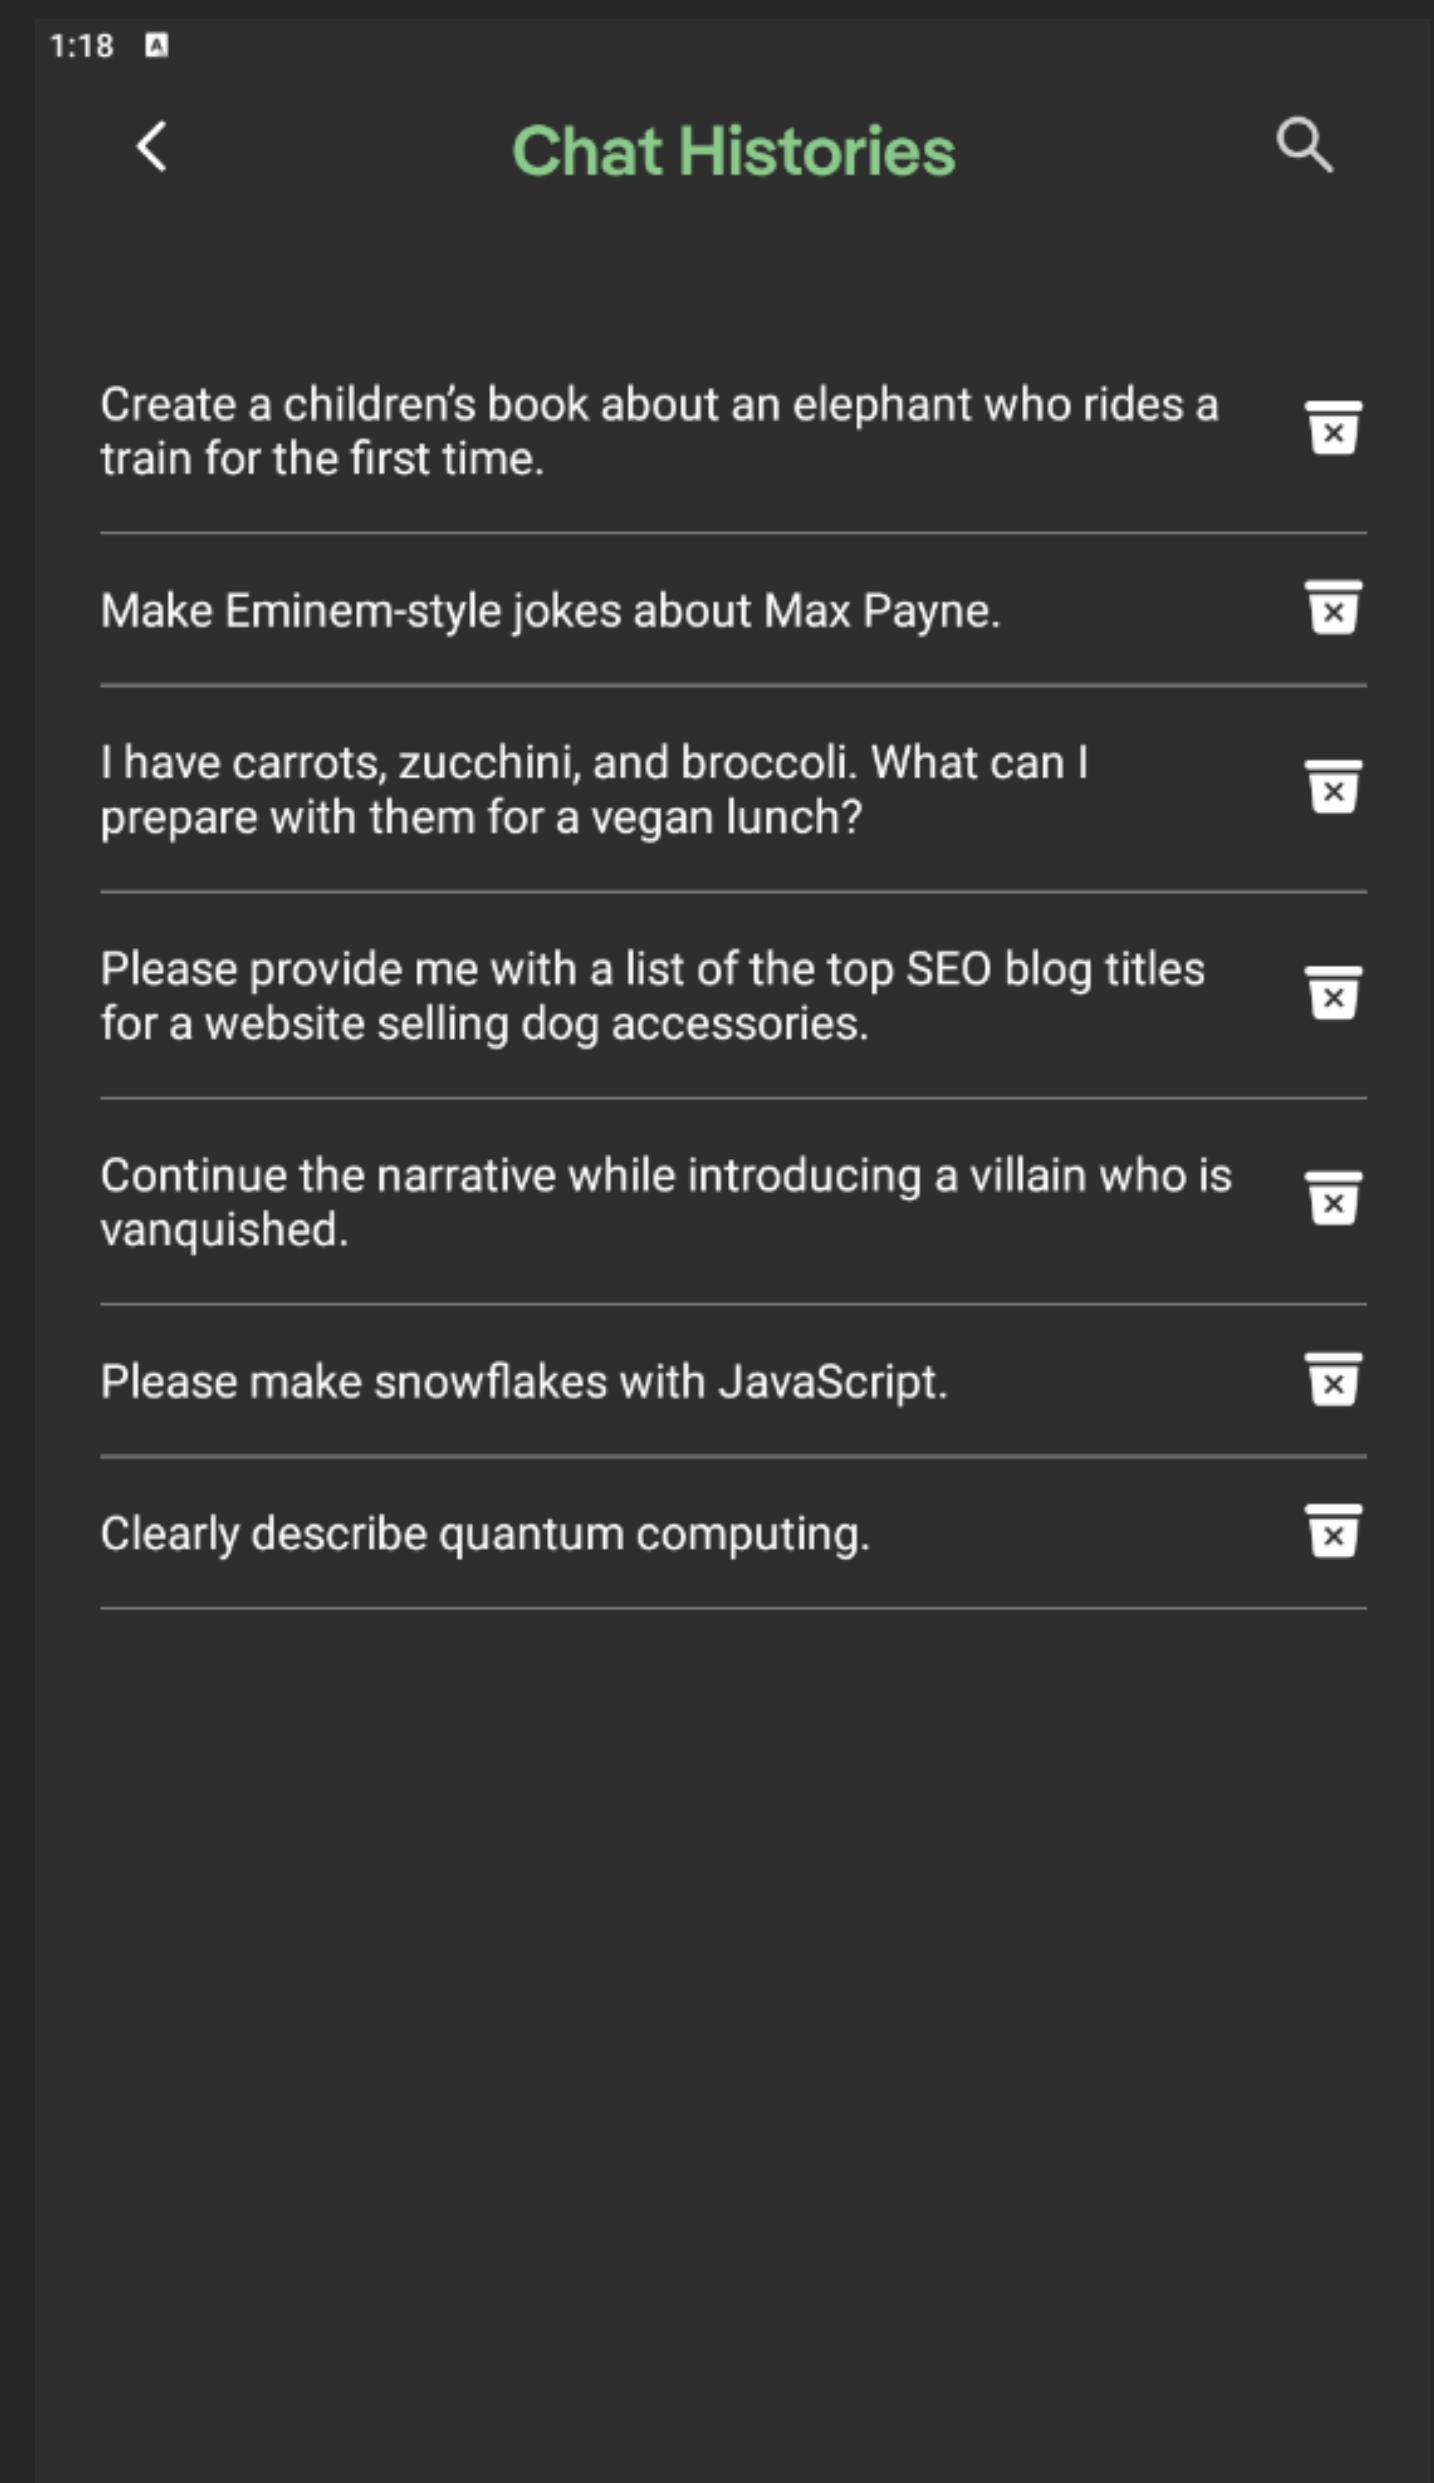

FRIENDIFY GPT is an AI language model and does not have the ability to protect or keep your personal information confidential. Therefore, it's important not to share any sensitive or personal information with FRIENDIFY GPT.

1. Chat box

End the conversation: When you're done with the conversation, you can simply close the chat box or say goodbye to FRIENDIFY GPT.

You can access the chat history in the 'Settings' and refer to or resume previous conversations, as they are all saved there

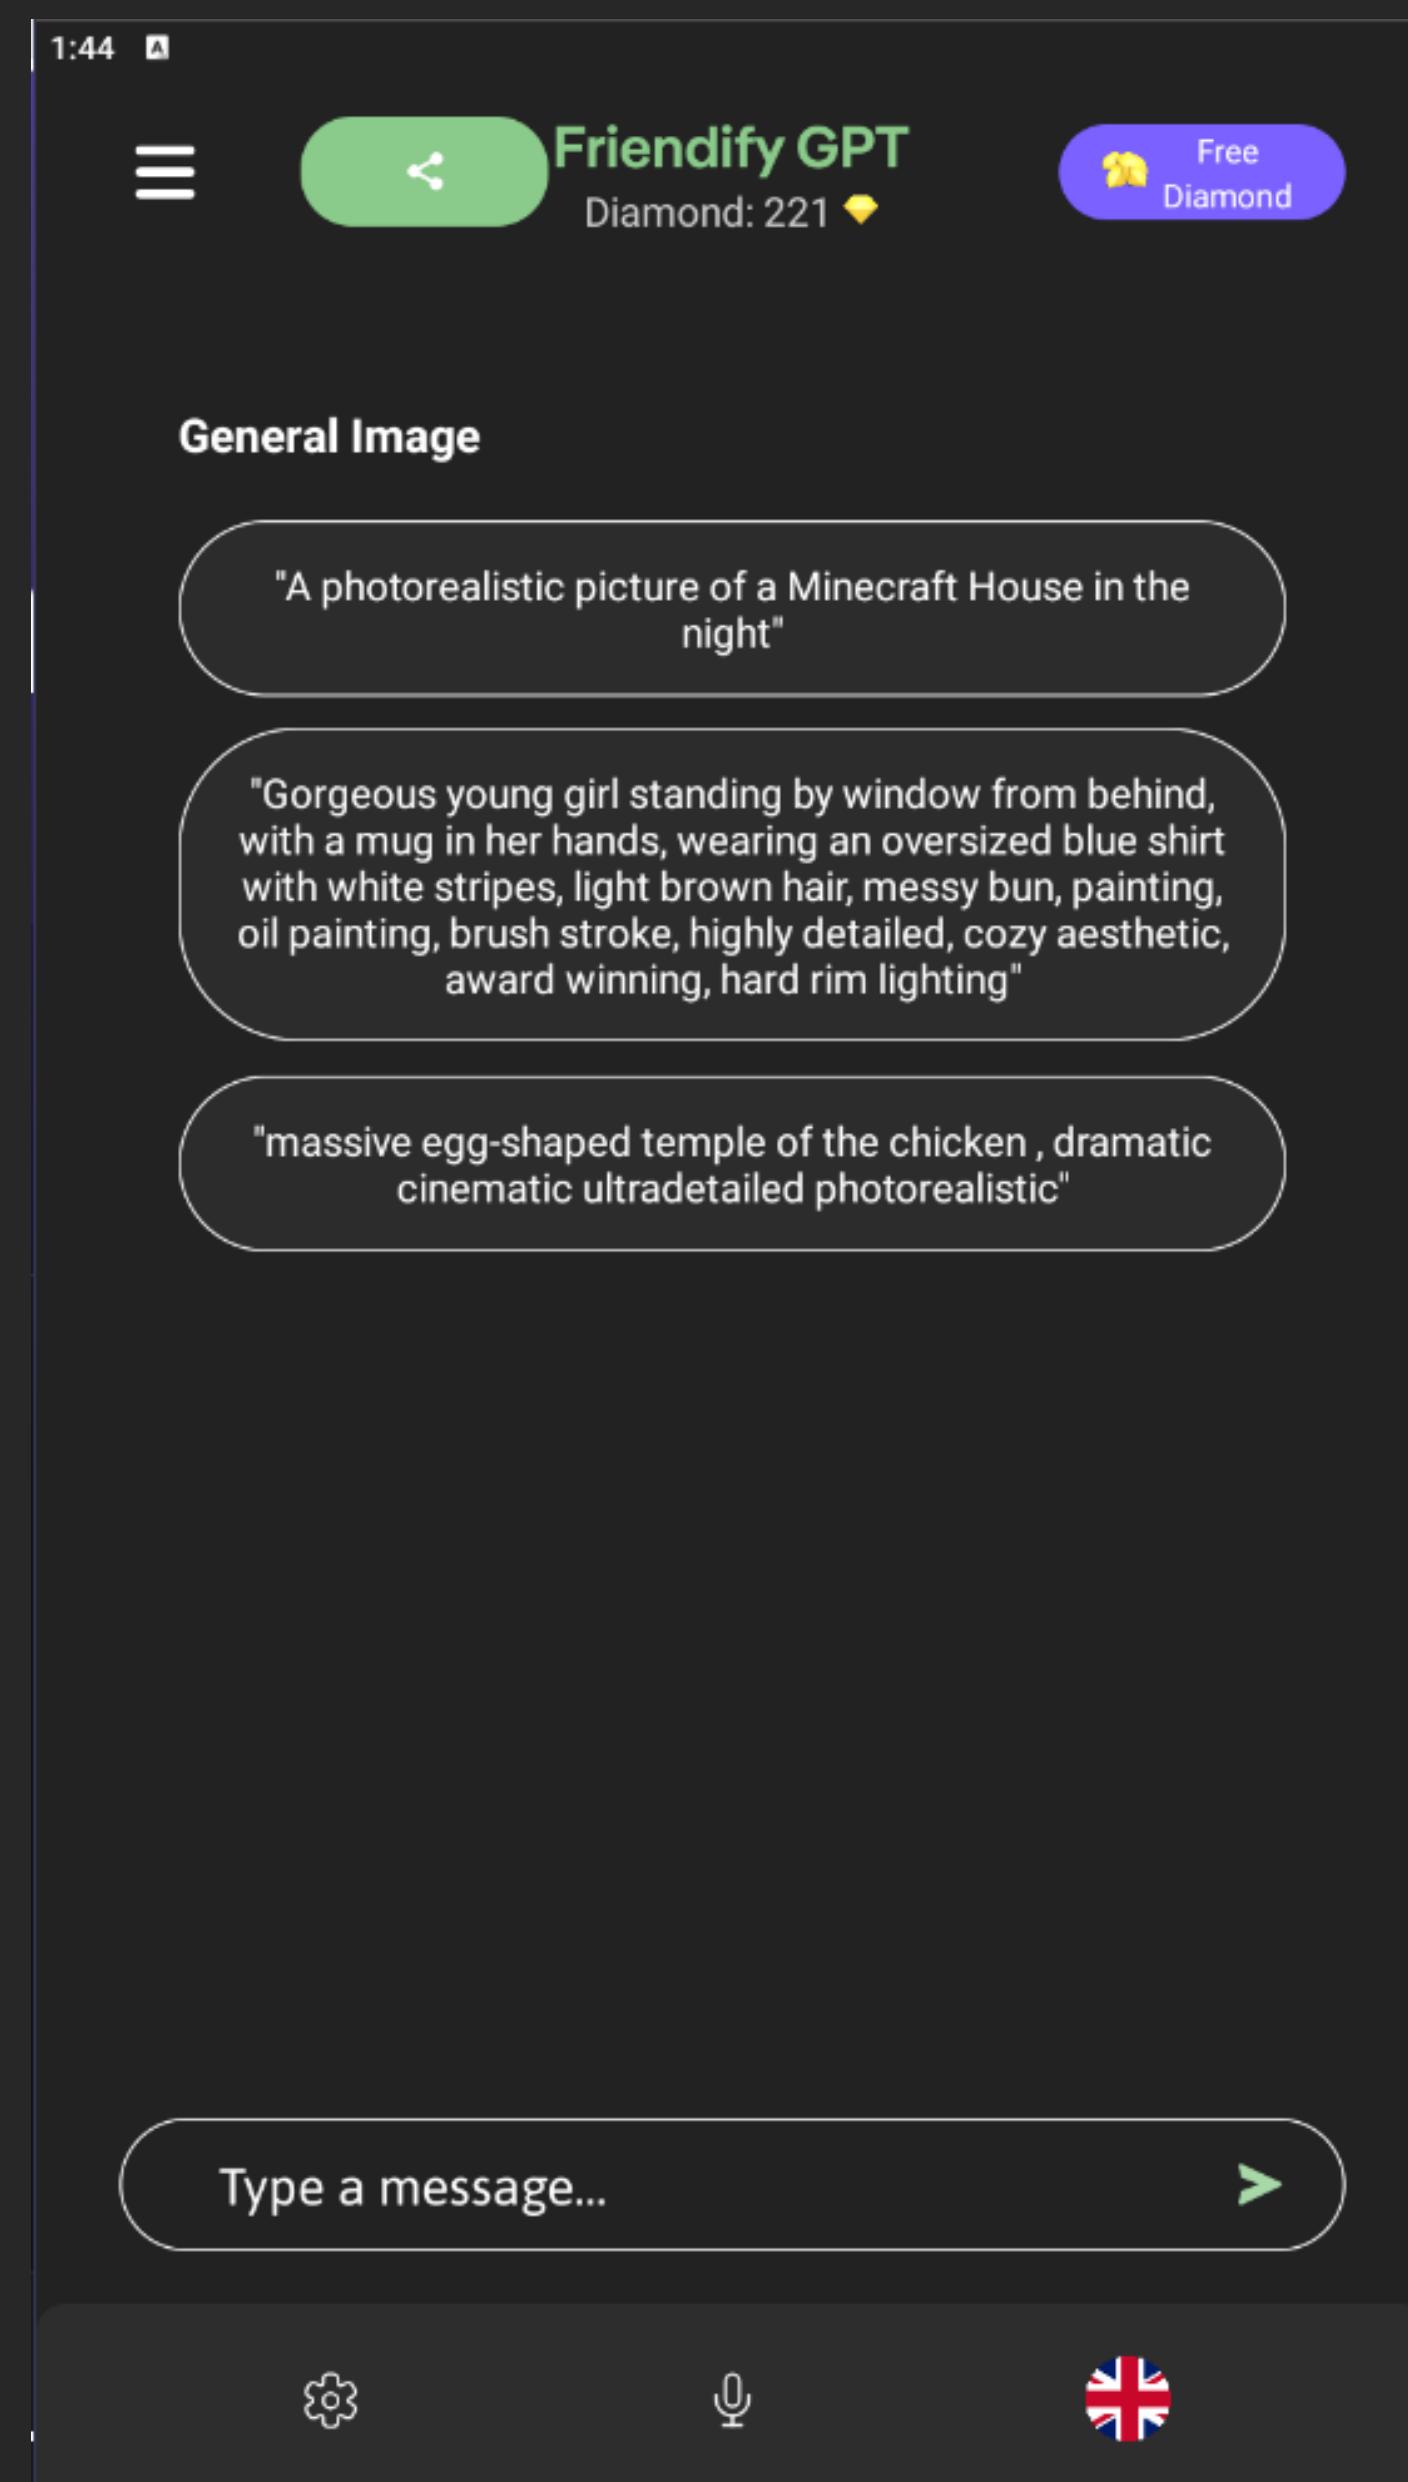

2 Image Generate

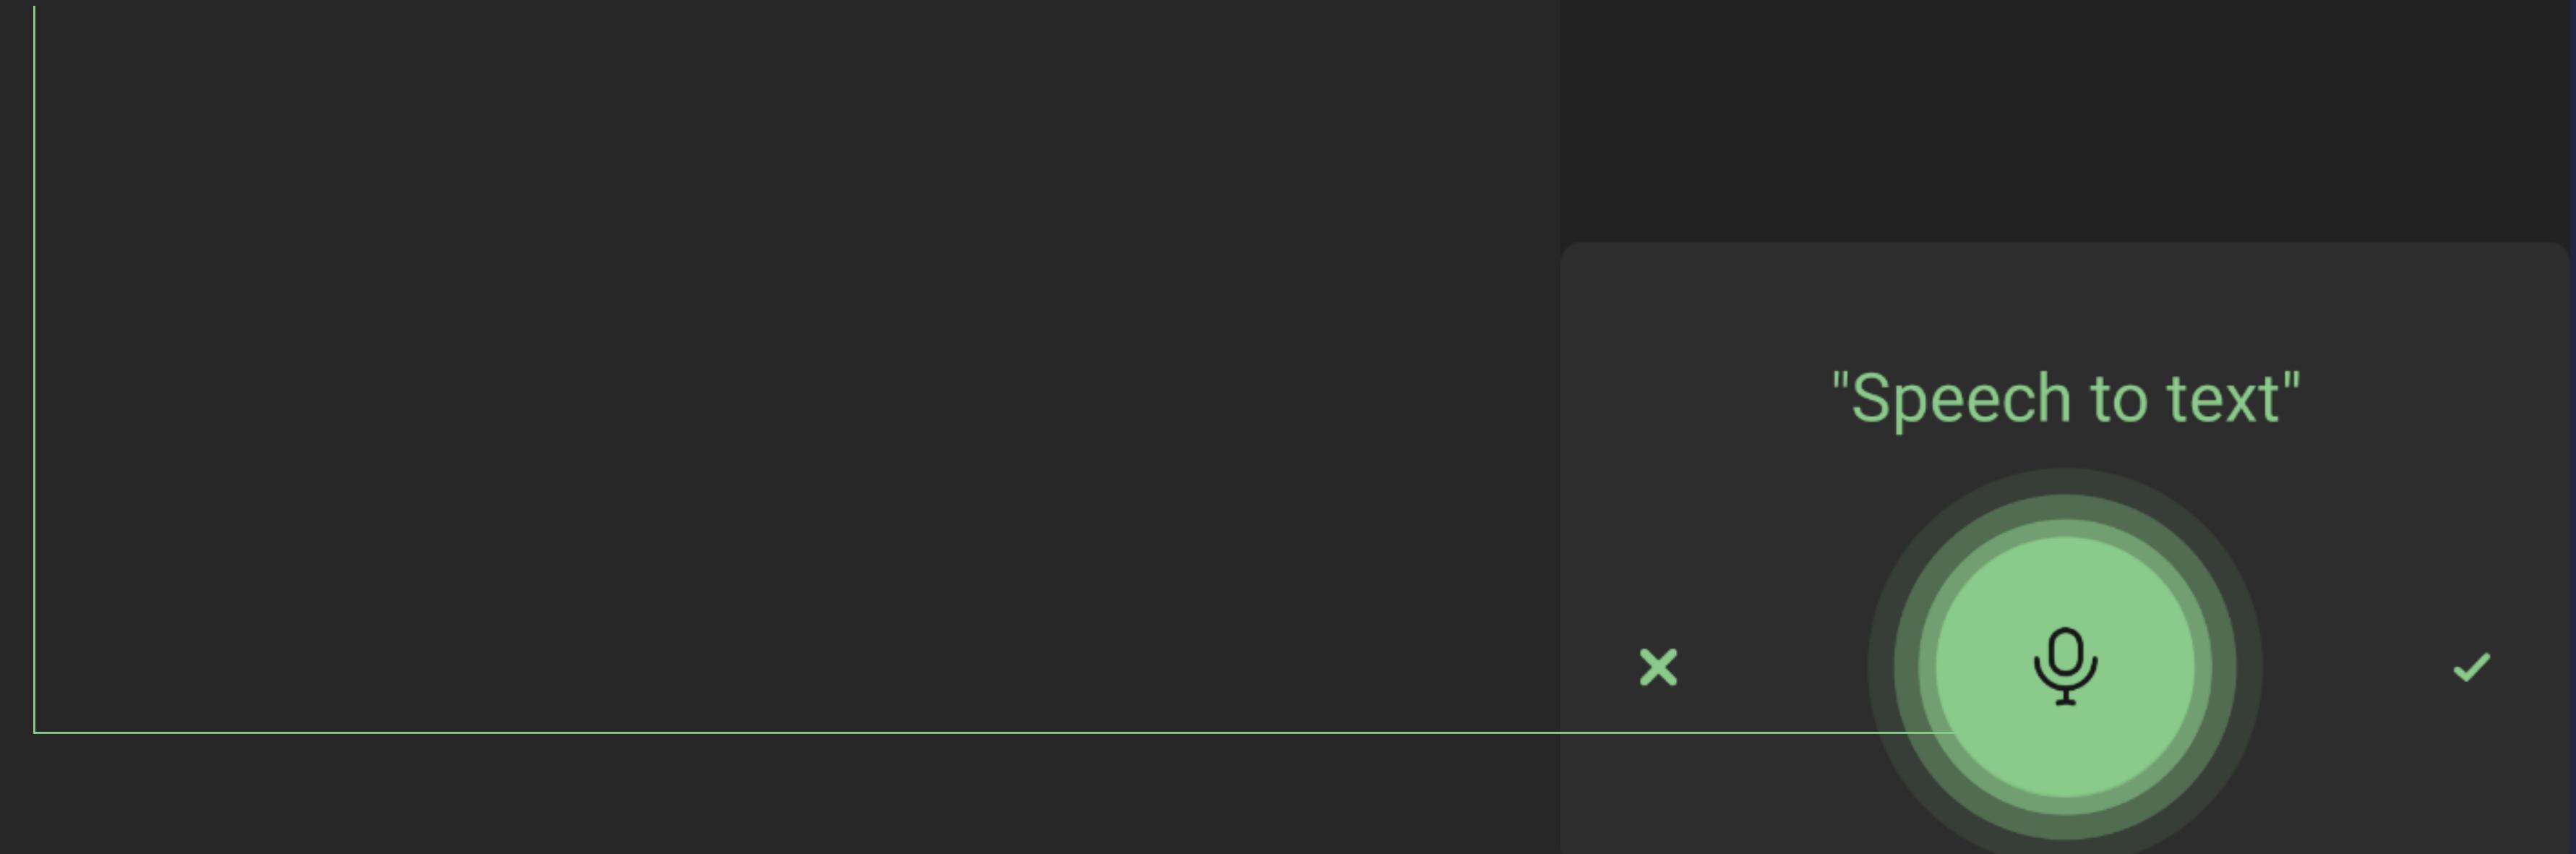

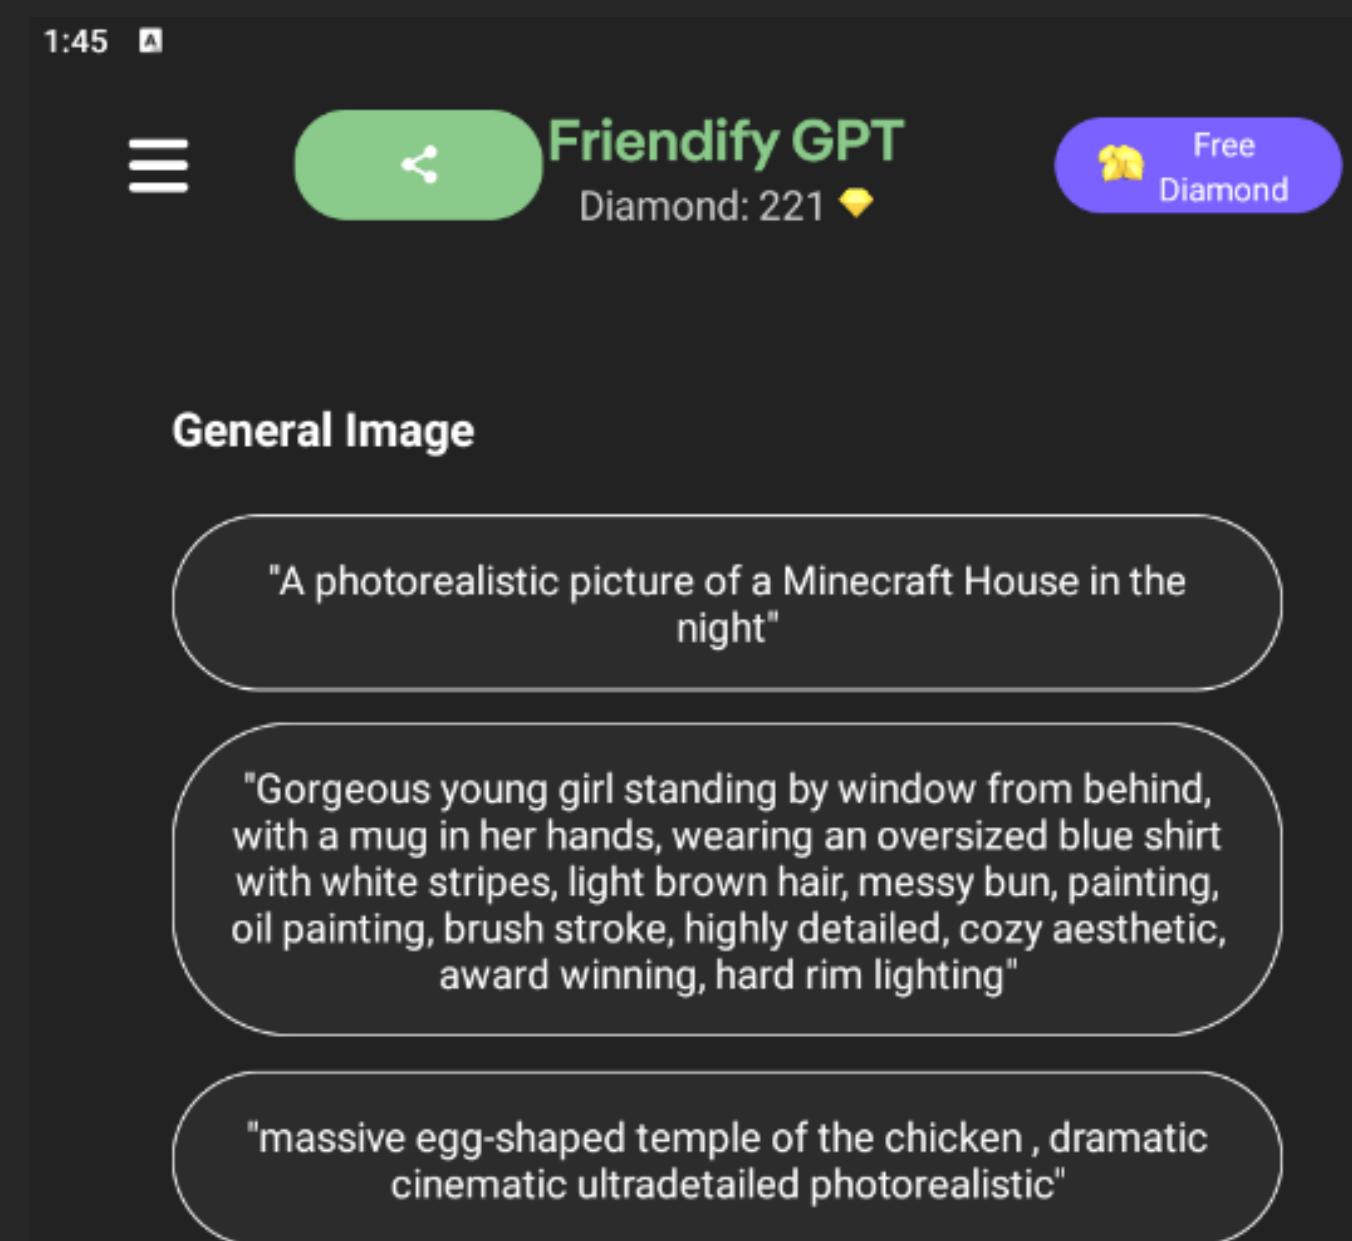

2. Image Generate

Enter your input: In the text box provided, you can enter the description of an image that you want FRIENDIFY GPT to generate. For example, you could type "a cat riding a skateboard" or "a tree made of broccoli."

2. Image Generate

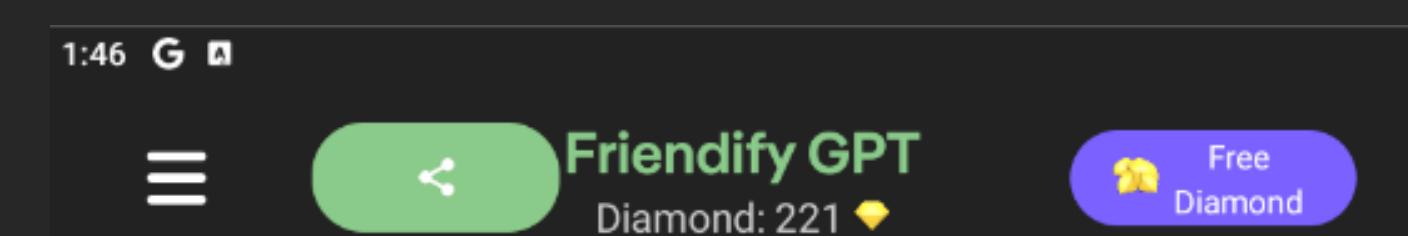

By clicking the voice button, you can also input your prompt using the voice function instead of typing it in

2. Image Generate

Be specific in your input: To get the best results from FRIENDIFY GPT, it's important to be as specific and detailed as possible when describing the image you want it to generate. Use descriptive words, and try to include as much detail as possible.

Generate the image: After you've entered your input, click on the "Generate" button to have FRIENDIFY GPT create the image based on your input.

General Image

"A photorealistic picture of a Minecraft House in the night"

"Gorgeous young girl standing by window from behind, with a mug in her hands, wearing an oversized blue shirt with white stripes, light brown hair, messy bun, painting, oil painting, brush stroke, highly detailed, cozy aesthetic, award winning, hard rim lighting"

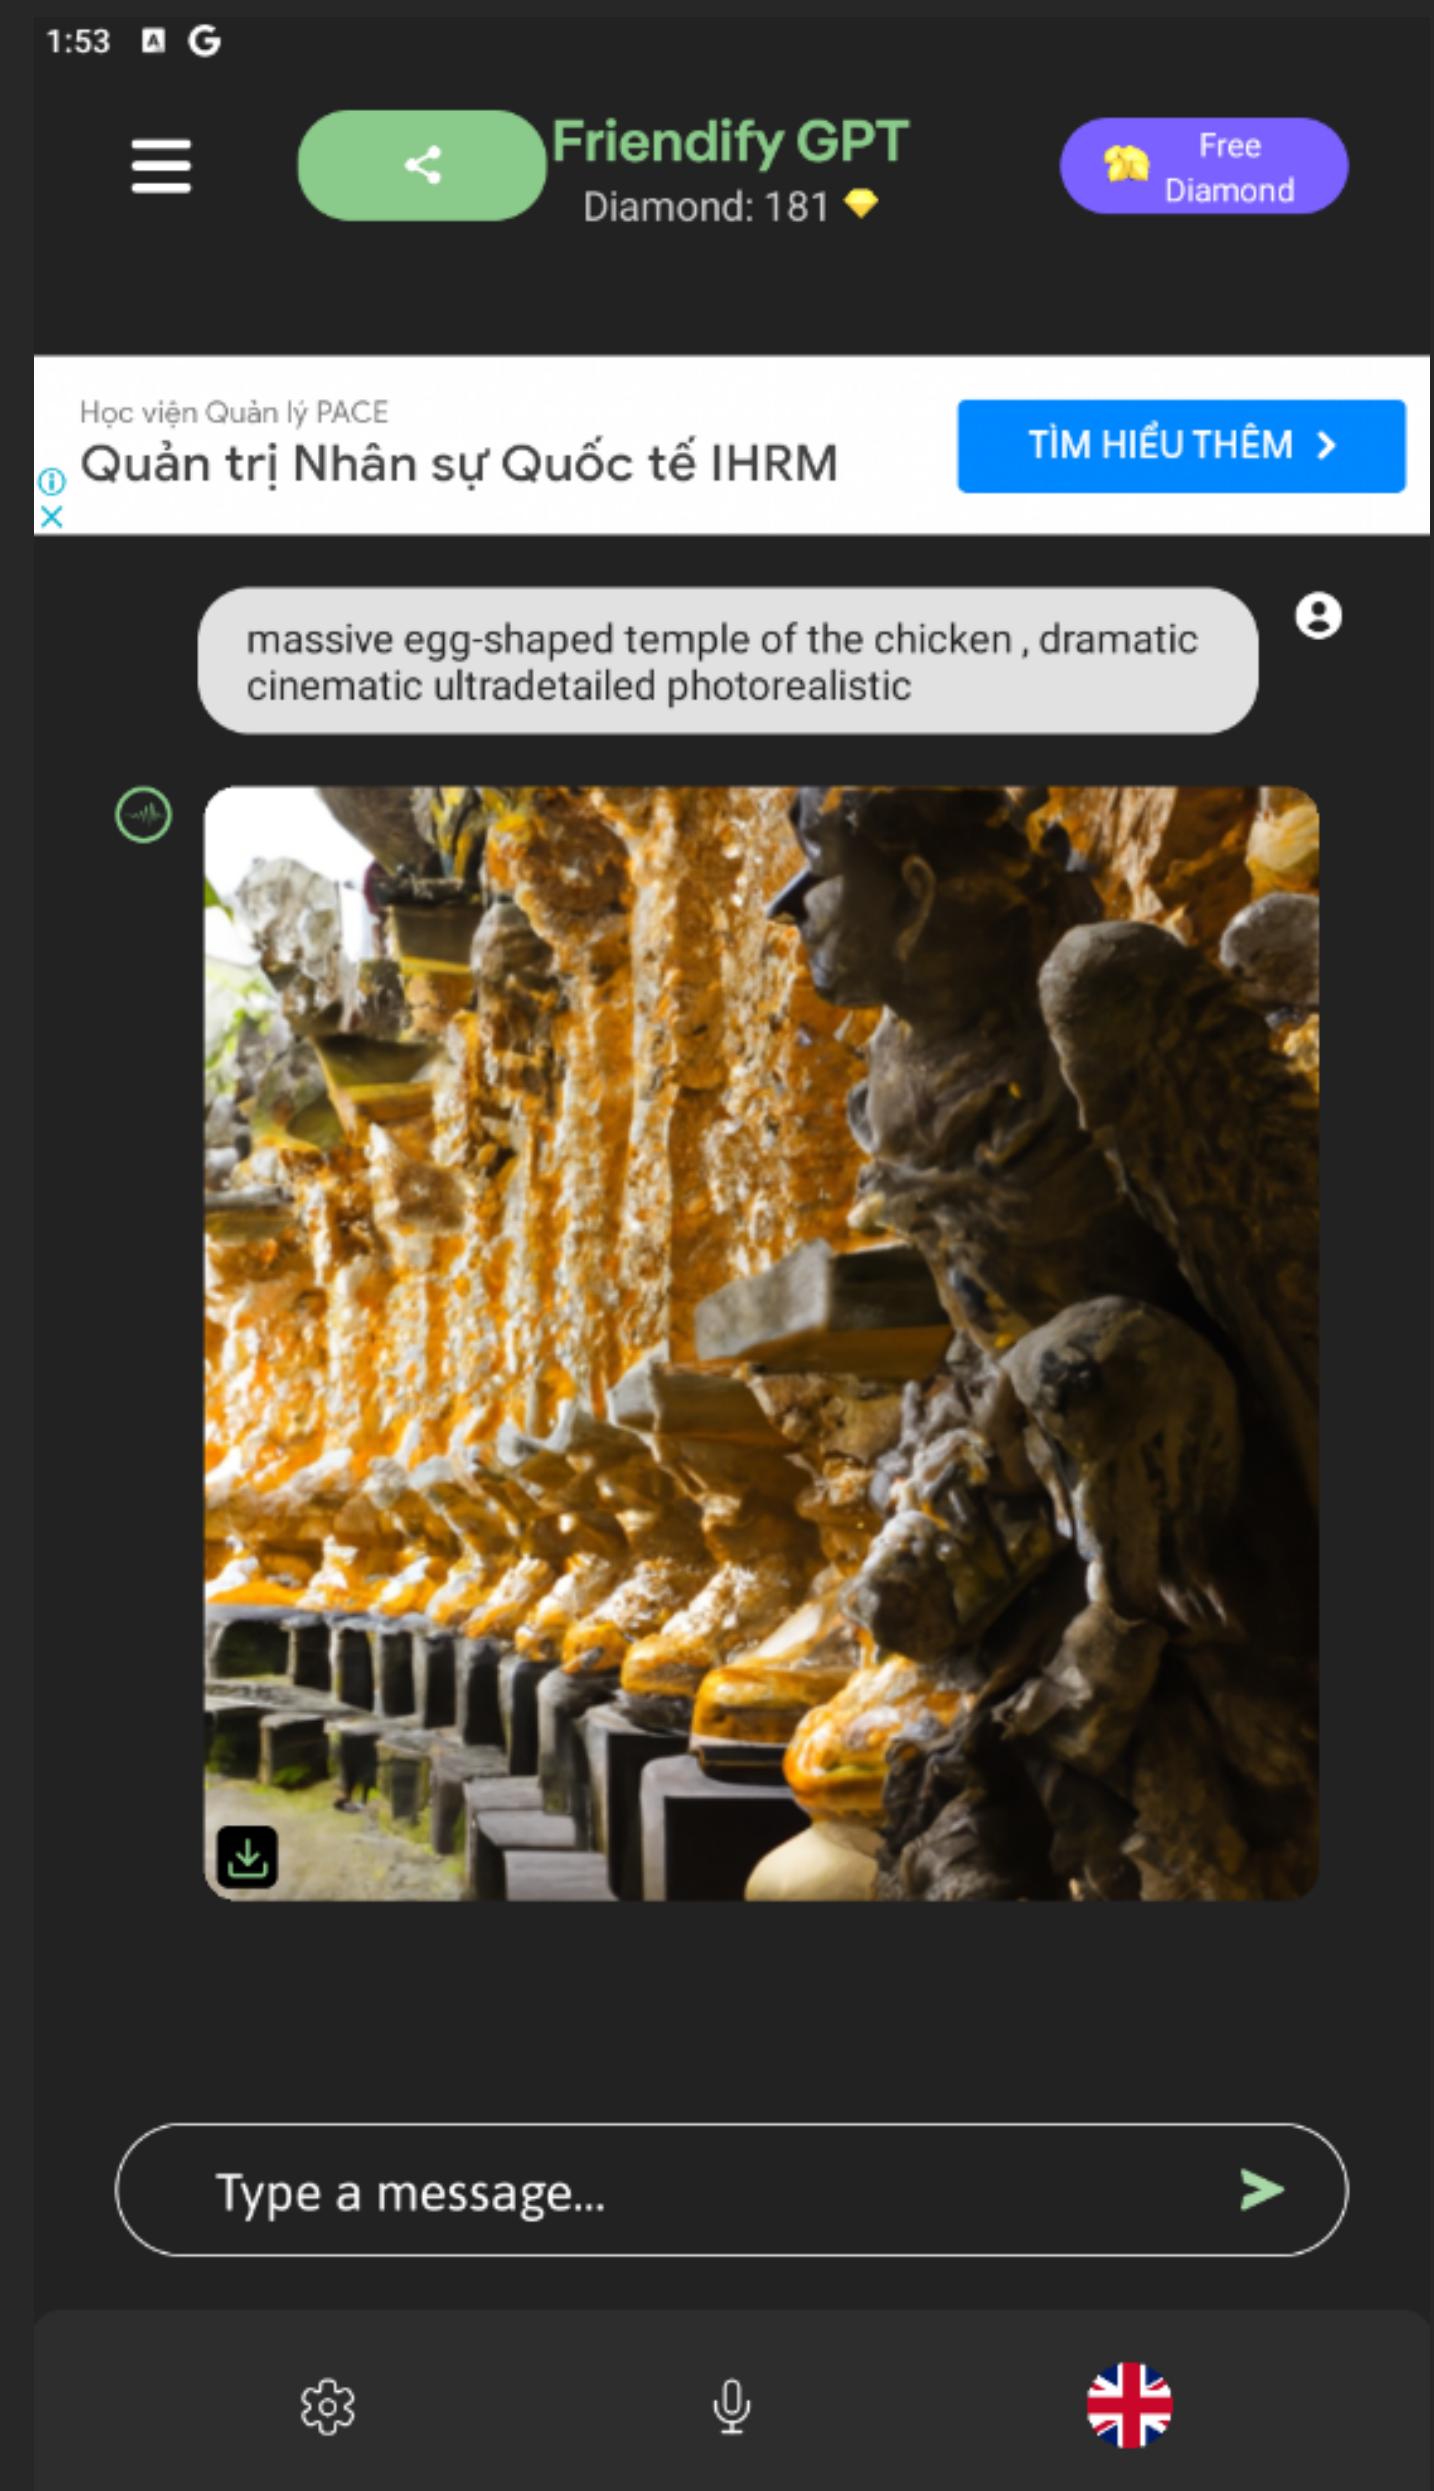

"massive egg-shaped temple of the chicken , dramatic cinematic ultradetailed photorealistic"

massive egg-shaped temple of the chicken , dramatic cinematic ultradetailed photorealistic >

2. Image Generate

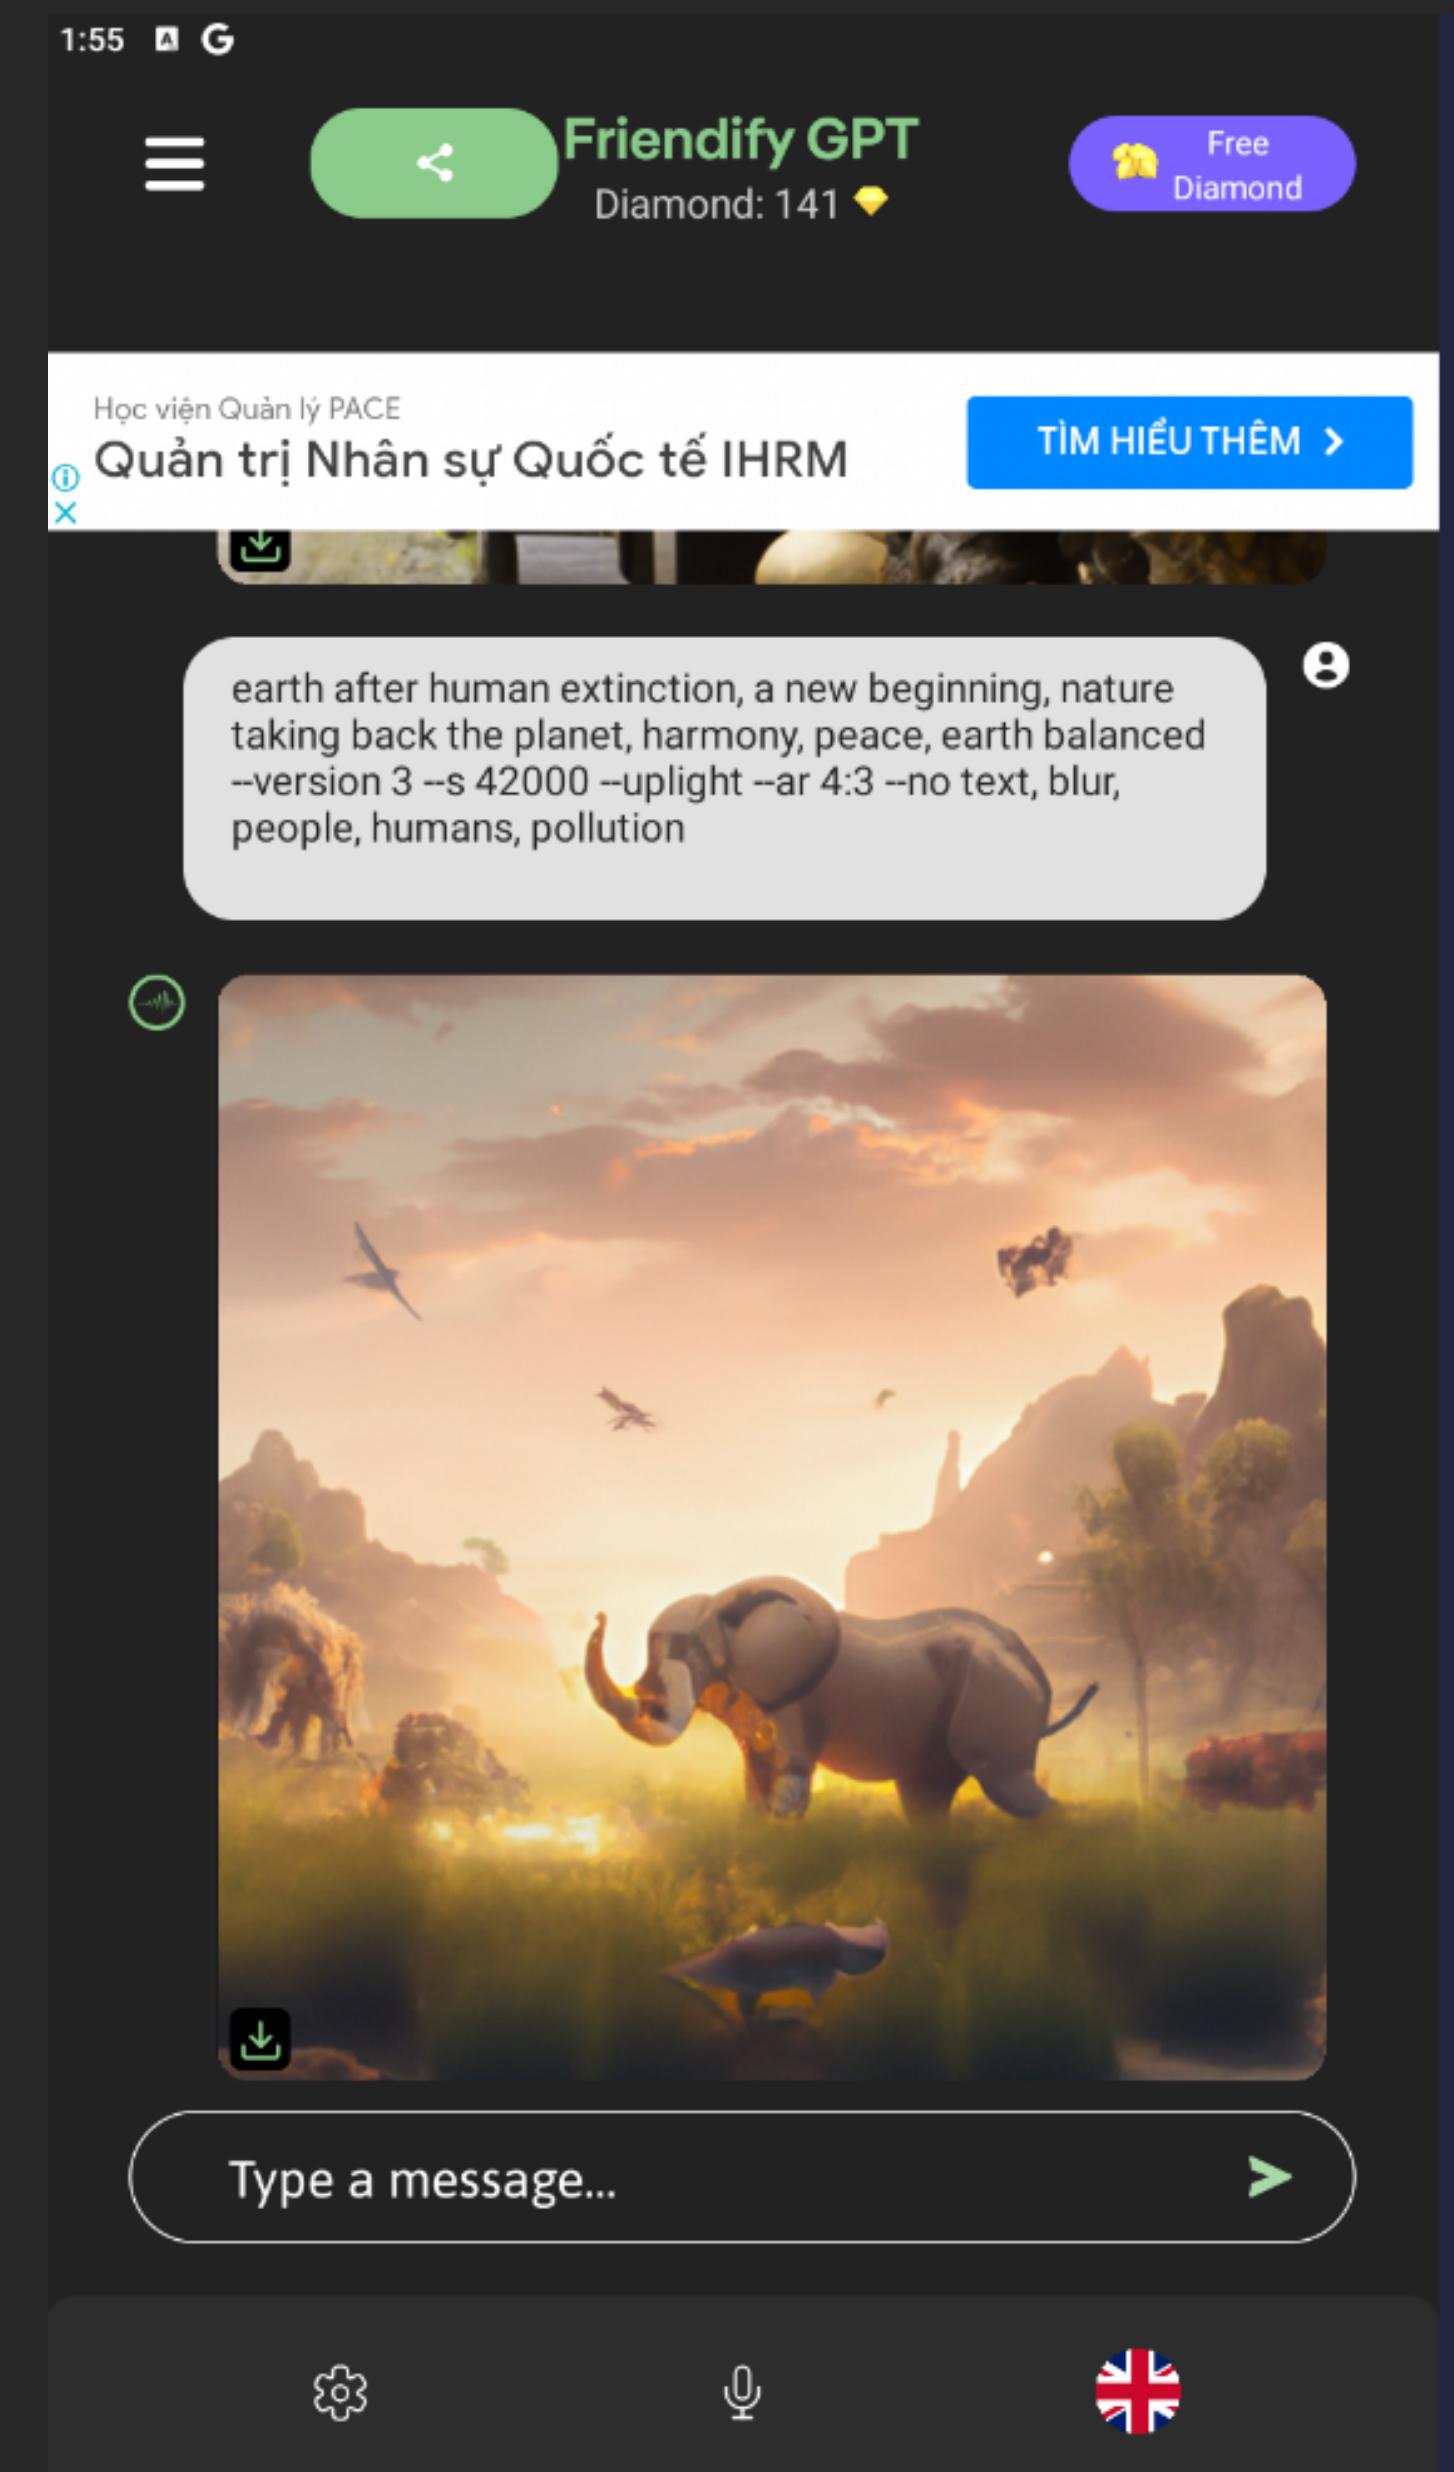

Evaluate the image: Once the image is generated, you can evaluate whether it meets your expectations and matches the description you provided. If you're satisfied with the image, you can download it or share it on social media.

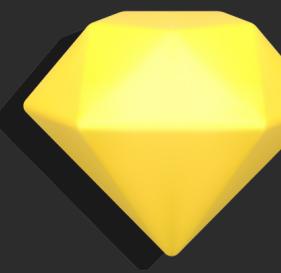

2. Image Generate

Experiment with different inputs: You can experiment with different types of inputs and see how FRIENDIFY GPT responds. For example, you could try entering more complex descriptions or more abstract concepts.

Understand the limitations: While FRIENDIFY GPT can generate incredibly detailed and realistic images based on text inputs, it also has its limitations. Not all inputs will result in a perfect or even satisfactory image, and some concepts may be difficult for FRIENDIFY GPT to visualize.

3 Diamond Currency System

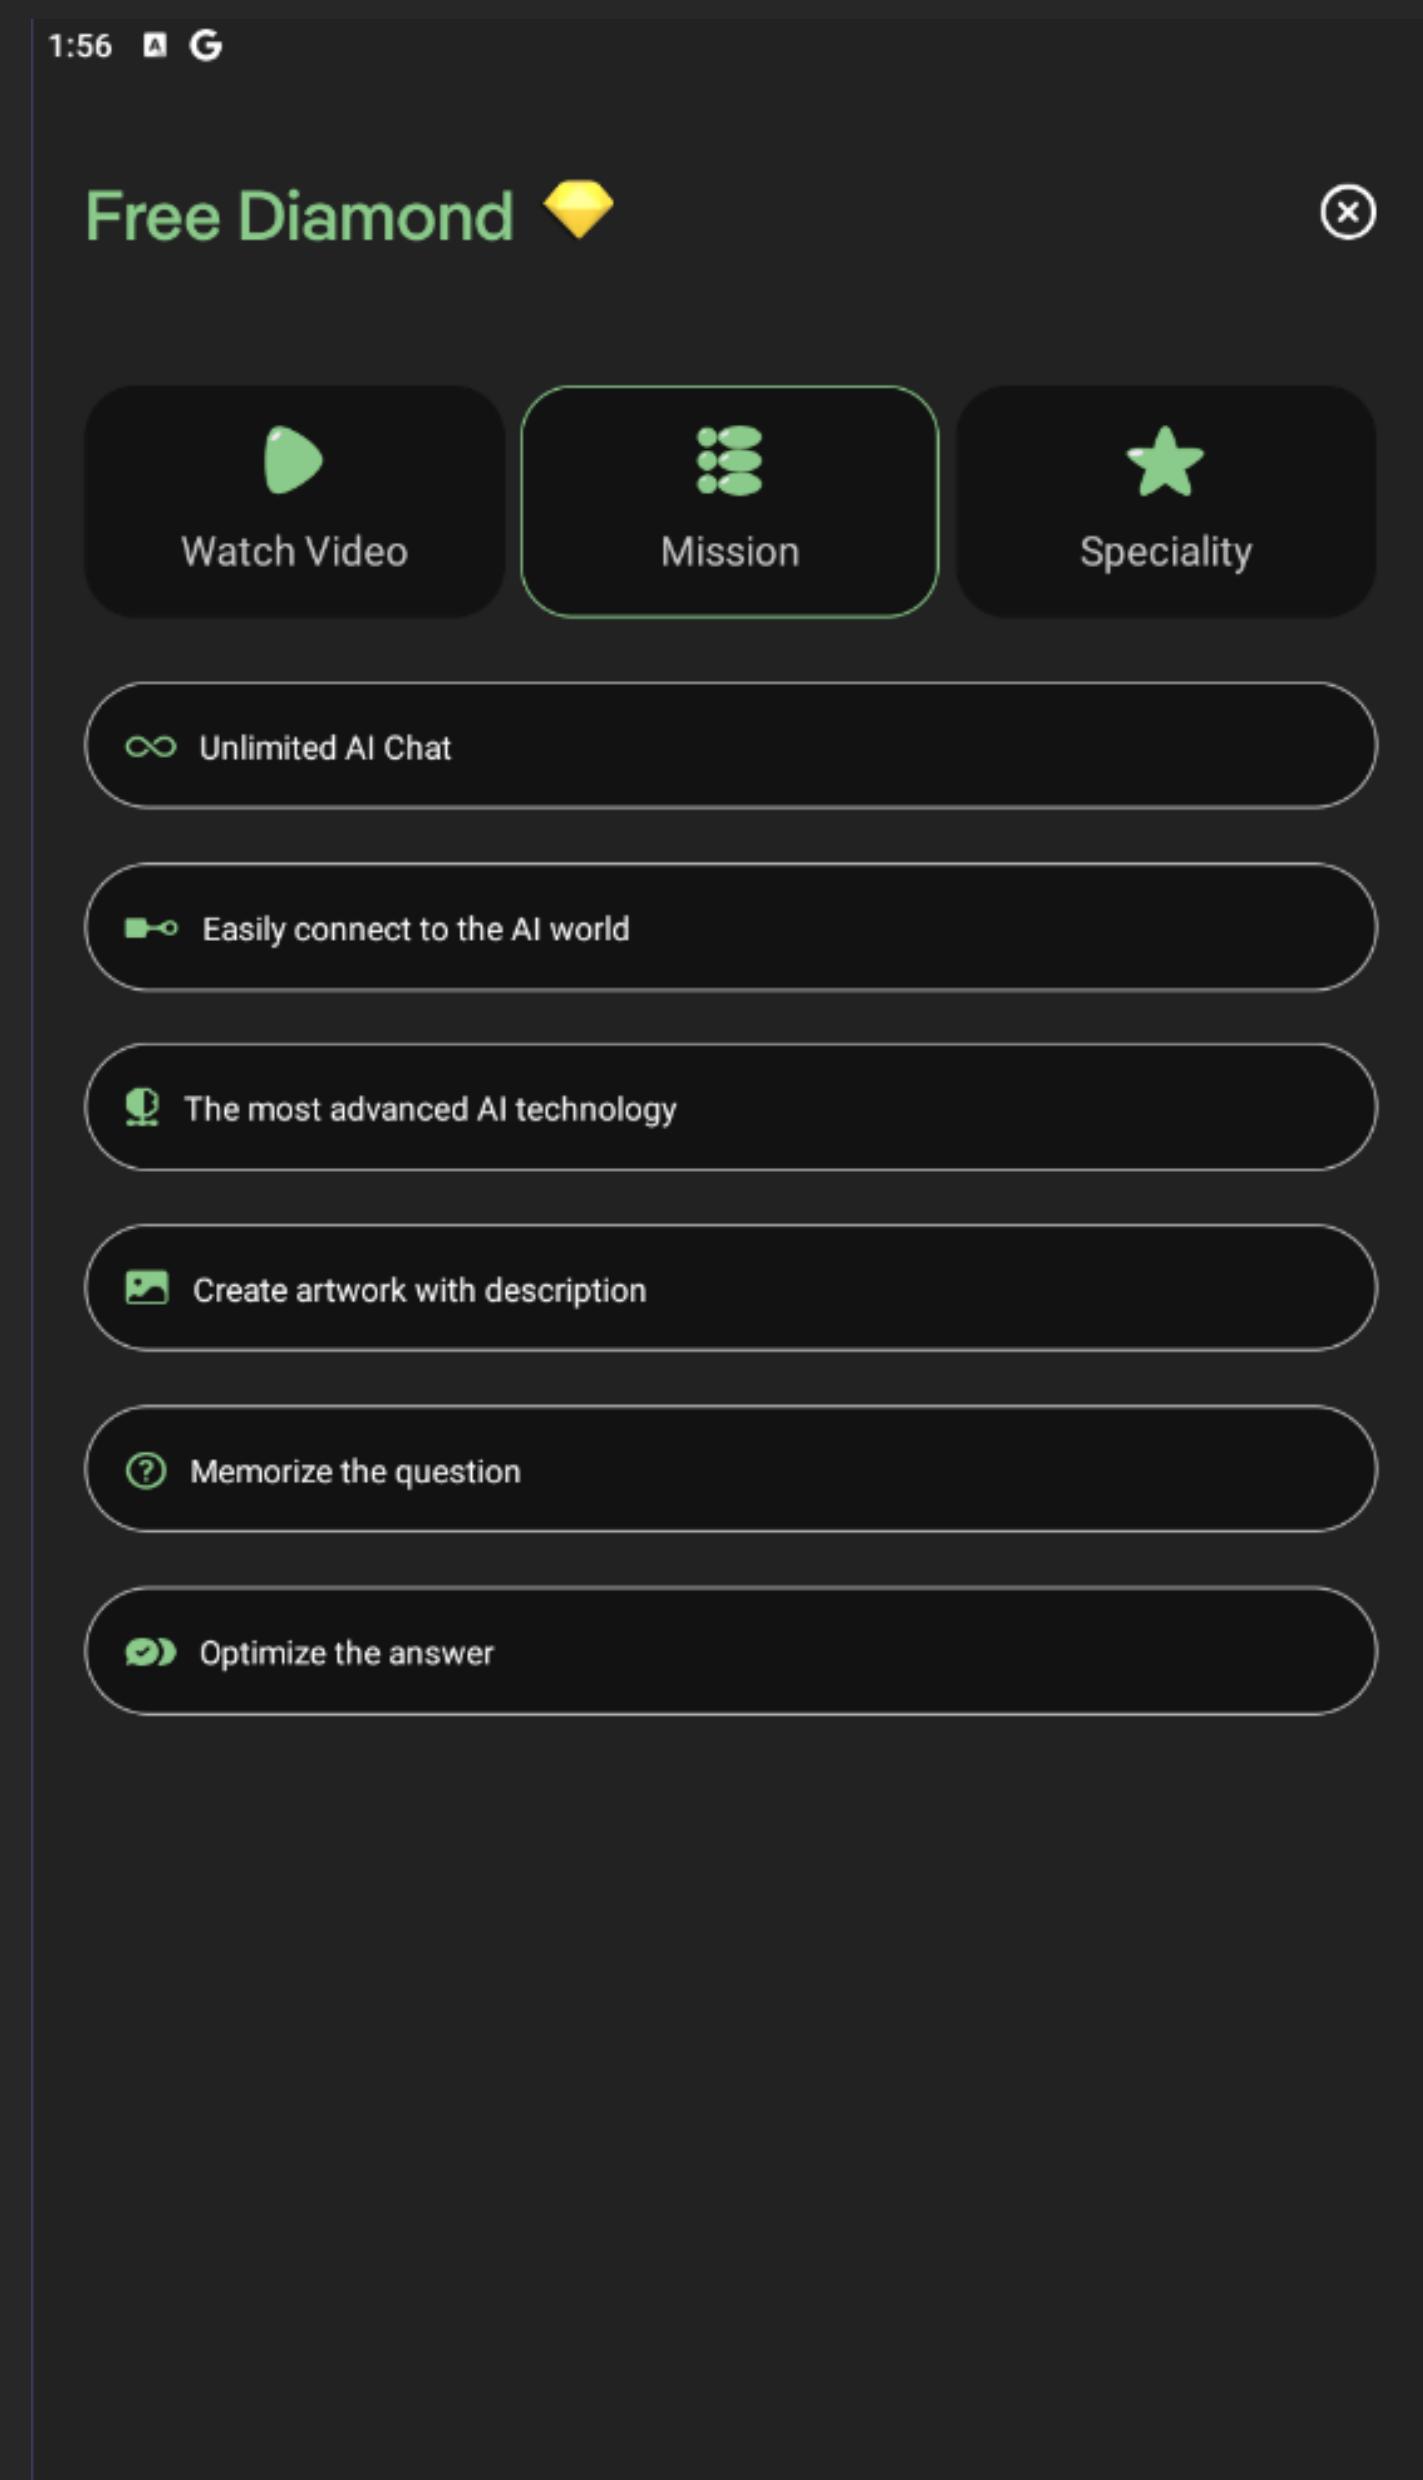

3. Diamond Currency System

Diamonds are the currency used within your AI personal assistant app, which users can use to access various features. There are two ways in which users can receive diamonds: through watching ads and by entering referral codes.

3. Diamond Currency System

Receive:

Users will receive **5 diamonds**. Each time they watches a rewards video. Users can watch an unlimited number of ads per day.

3. Diamond Currency System

The user will receive **50 diamonds**. If someone enters a user's referral code successfully.

The screenshot shows a mobile application interface titled "Referral". At the top, there is a header with a back arrow and the word "Referral". Below the header, there is a section labeled "Referral" with a text input field containing the code "OJT4AQFO" and a copy icon. To the right of the input field is a refresh icon. Underneath this, it says "Total referral 0". There is also a section for "Referral code" with an empty input field. The main content area is titled "Referral Policy" and contains five numbered points:

1. Each user who successfully creates an account will be given a unique 8-character referral code.
2. When a new user signs up for the app and enters a referral code, both the new user and the referring user will receive 50 Diamonds. A user can only enter a referral code once, and there is no limit to the number of people who can enter a single code.
3. Each time a user's referral code is entered by someone else, that user will receive 10 Points.
4. The leaderboard will be updated every 5 minutes and will be based on the user's Point Referral score.
5. At the end of each week or month, the top 10 users with the highest Point Referral score will be rewarded with prizes.

Below the policy section is a "Weekly reward" table:

Top	Diamond Reward
1	100
2	90

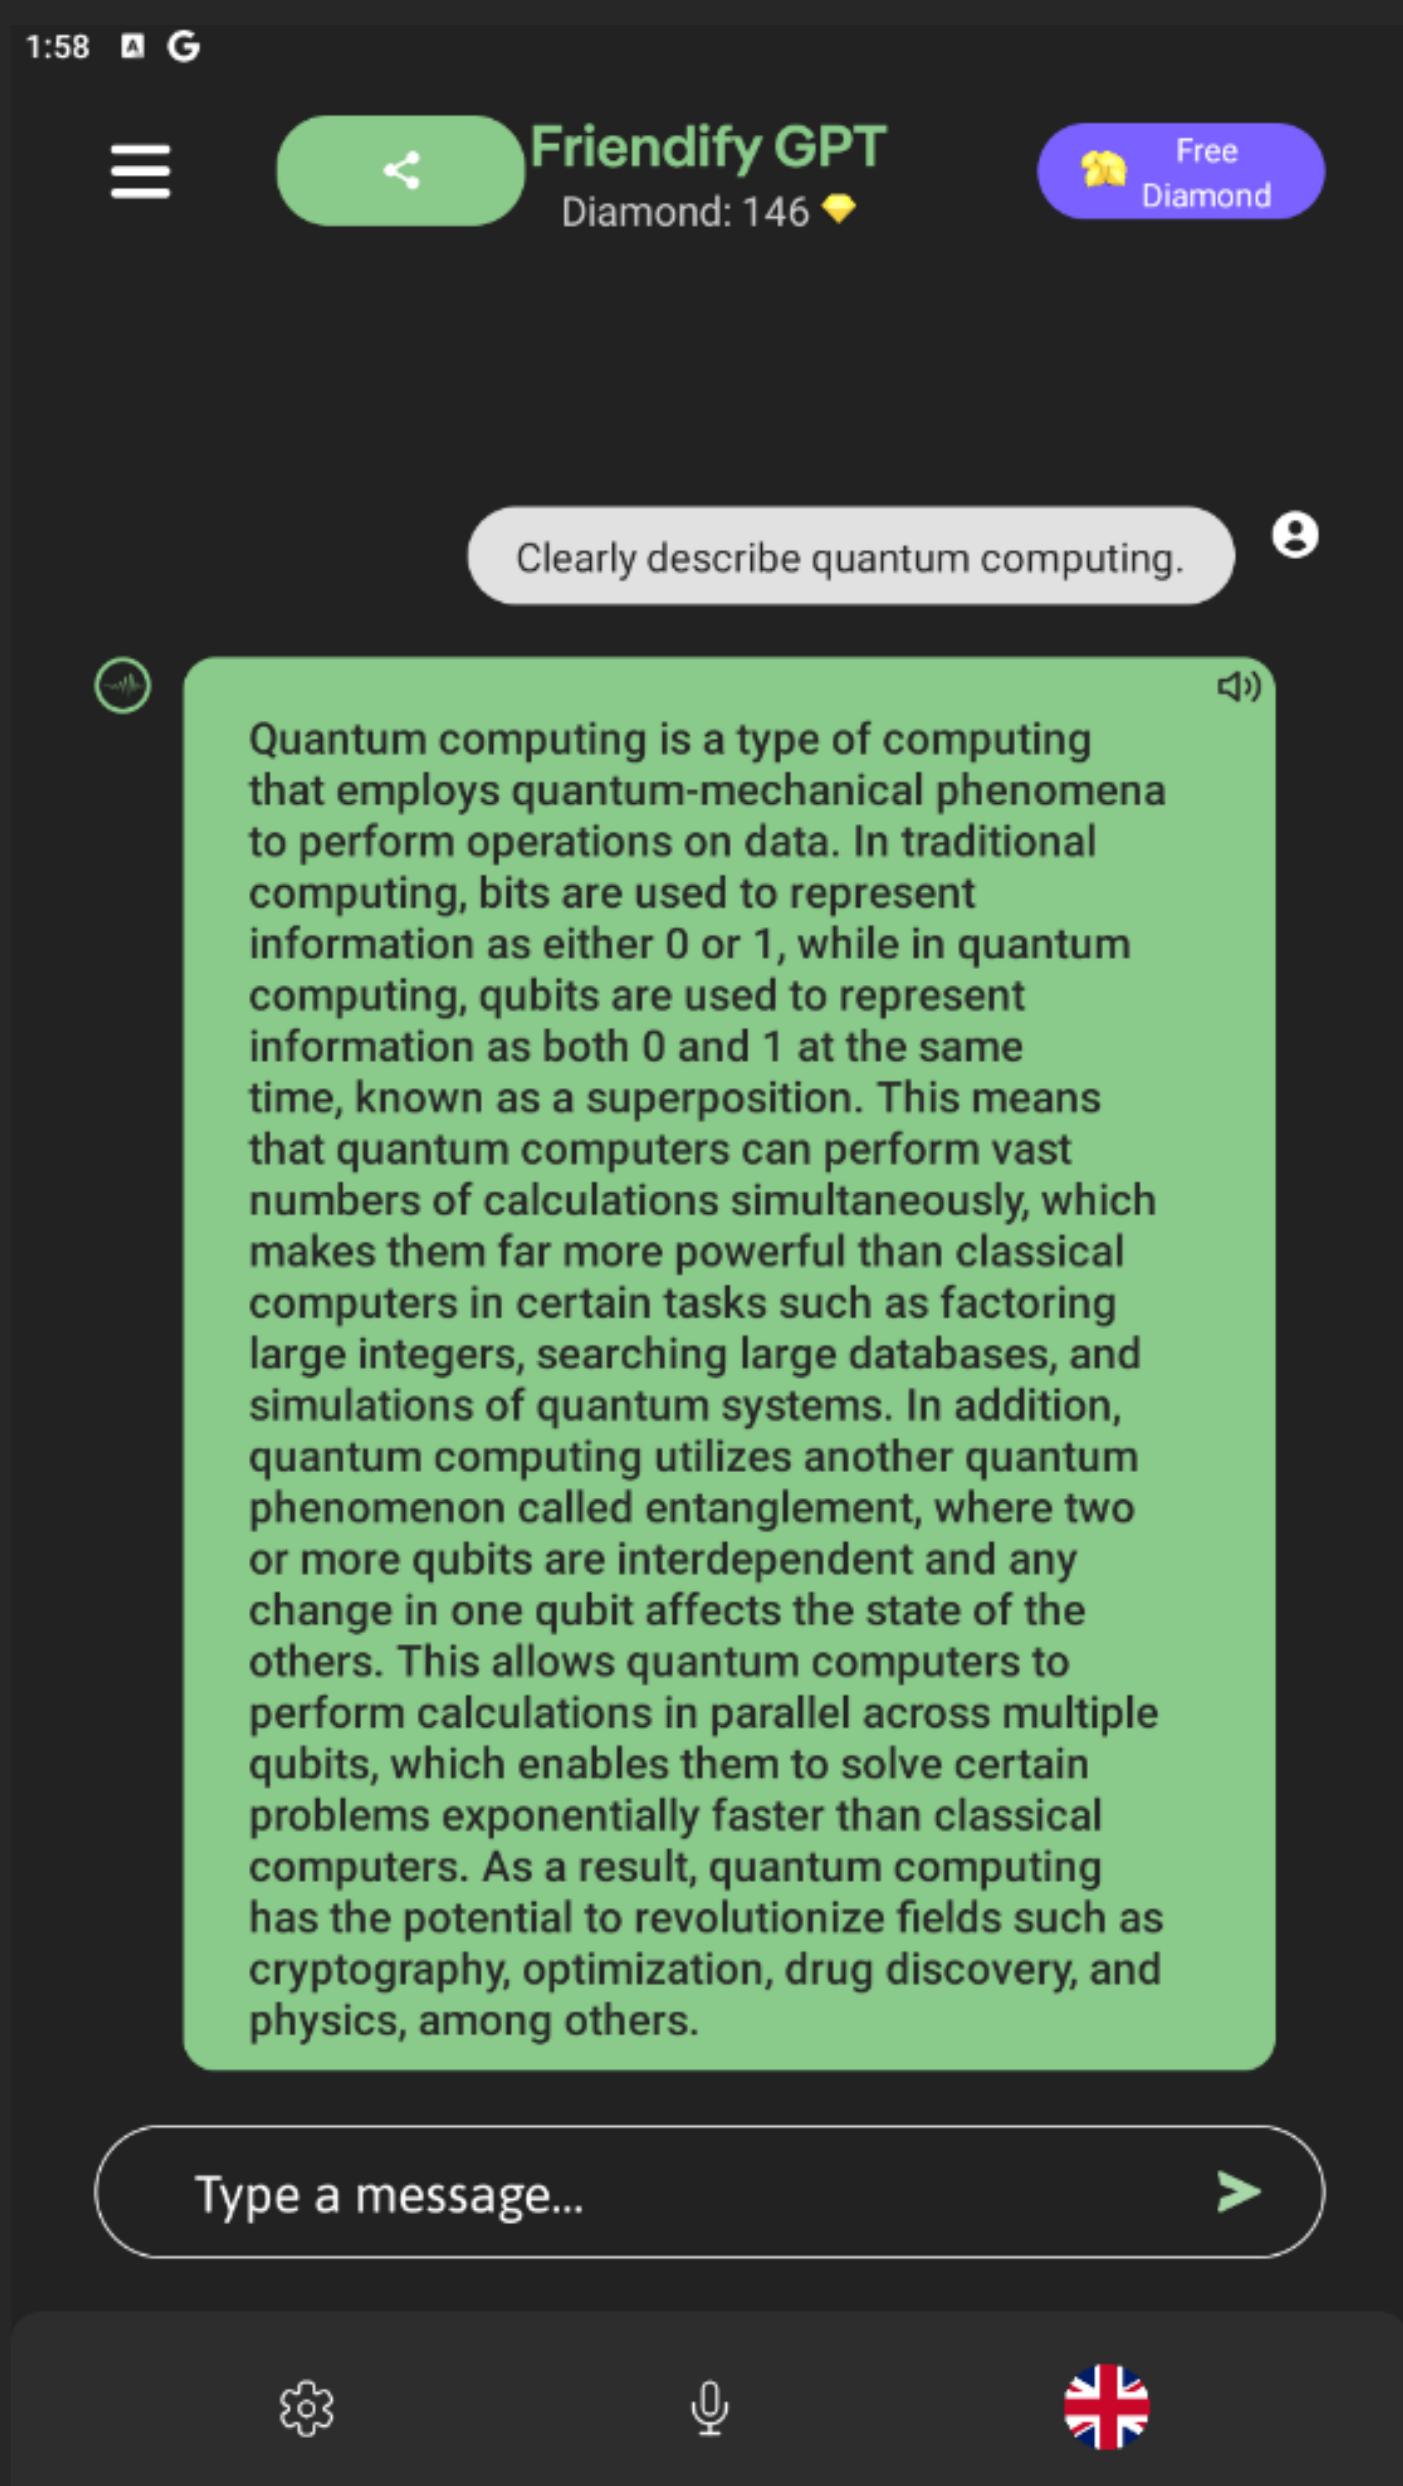

3. Diamond Currency System

Deduct:

However, diamonds can also be deducted from a user's account if they use certain features within the app.

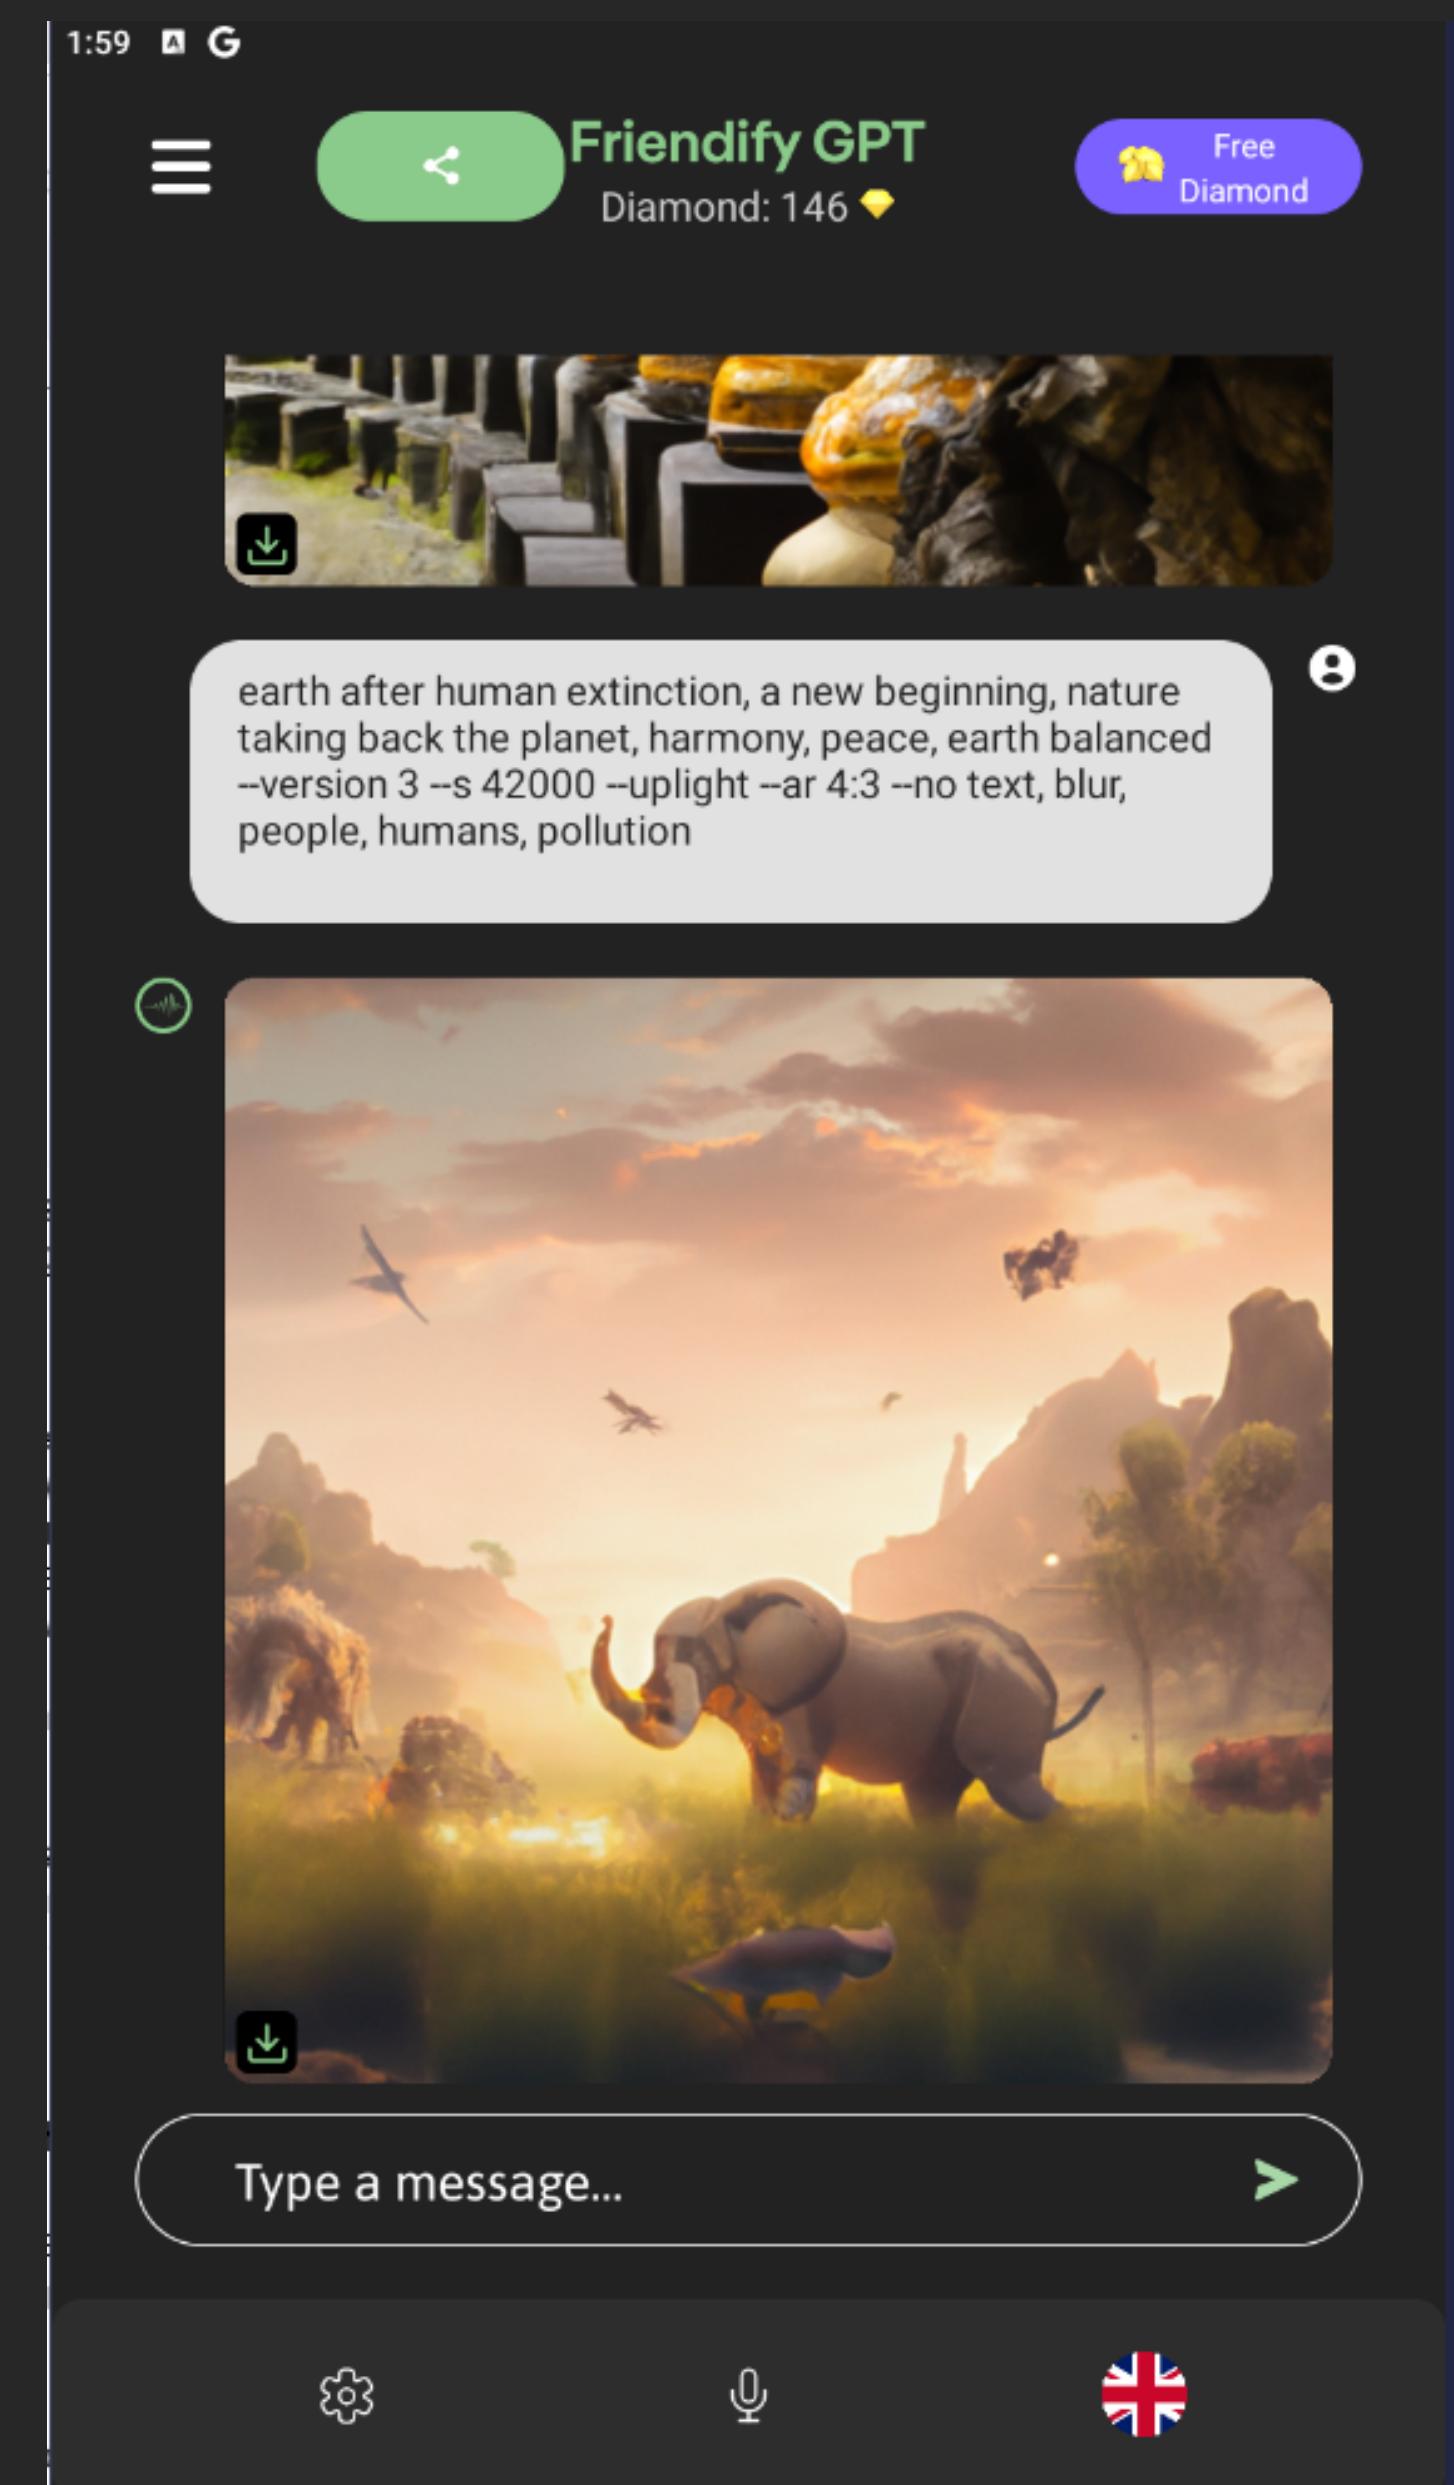

Specifically, the system deducts diamonds in the following ways:

1 diamond will be deducted from a user's account each time they receive a response from the bot.

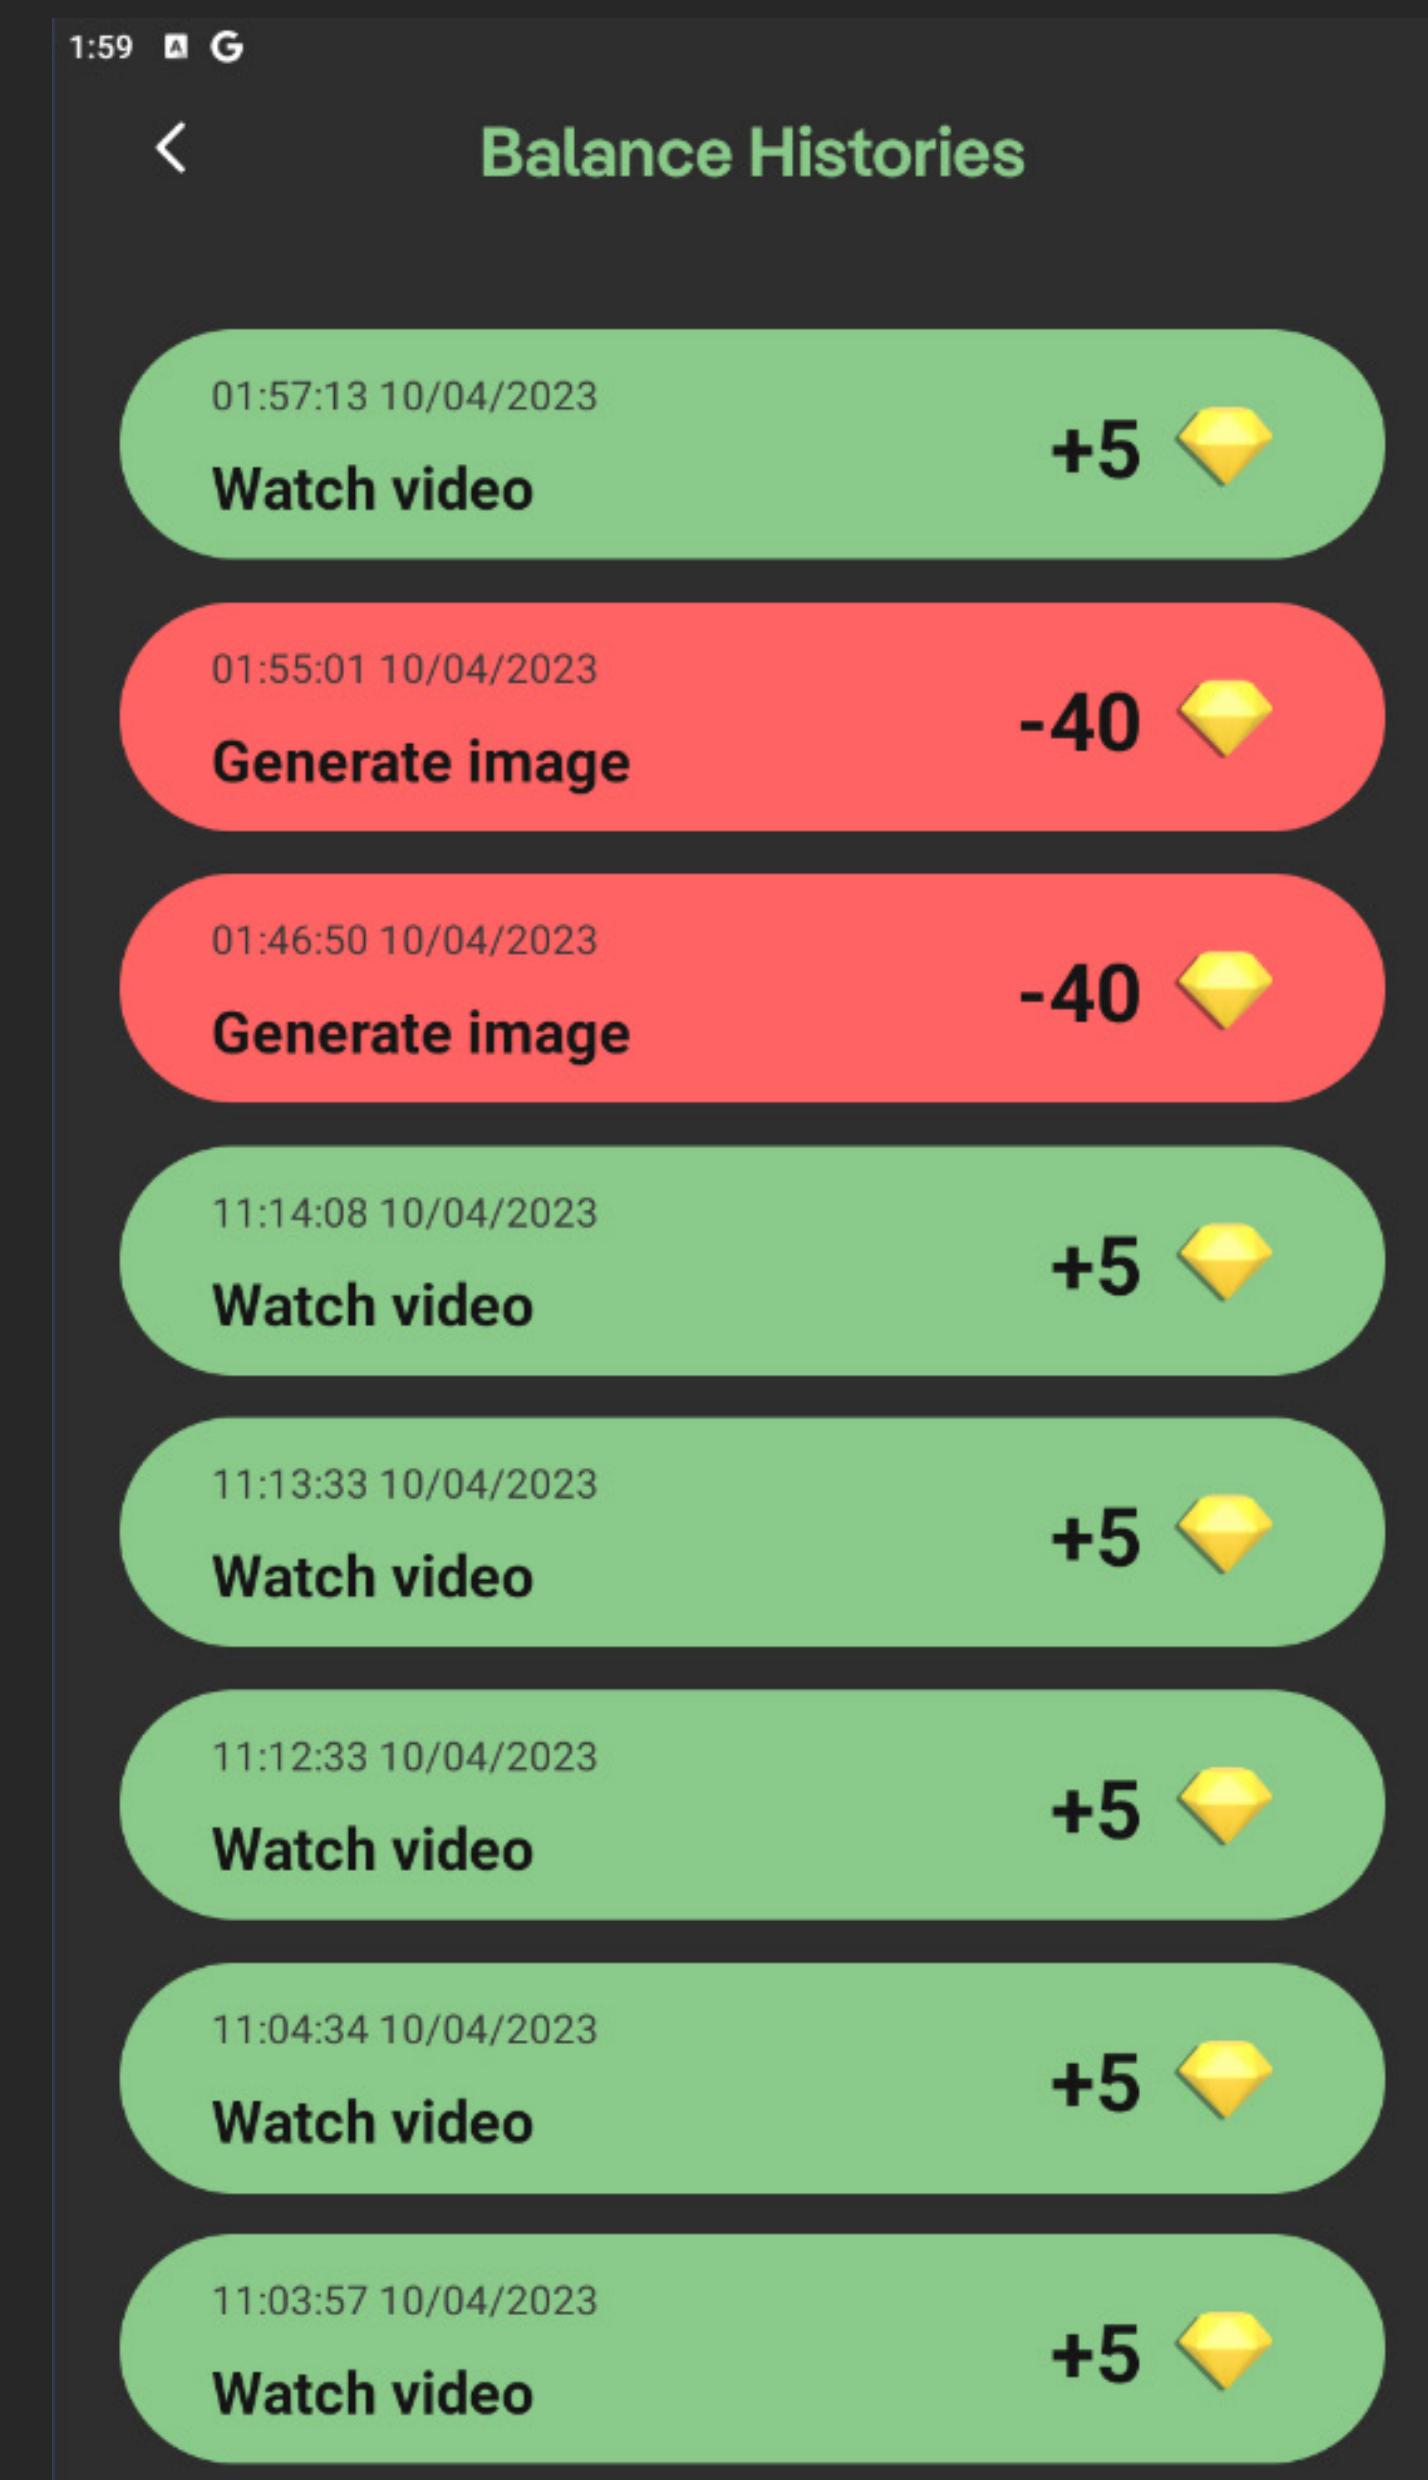

3. Diamond Currency System

40 diamonds will be deducted from a user's account each time they generates an image within the app.

3. Diamond Currency System

By keeping track of the diamonds received and deducted, users can monitor their account balance and decide how best to use their diamonds within the app.

4 Troubleshooting

4. Troubleshooting

If you experience any issues with the app, try the following:

Check your internet connection: The app requires an internet connection to function properly.

Check your microphone: If you're using the voice input feature, make sure your microphone is working properly.

Check your settings: Make sure the app has the necessary permissions to access your device's features.

Contact customer support: If you're still experiencing issues, contact customer support for assistance.

Overall, FRIENDIFY GPT is designed to make your life easier, save you time, and help you accomplish your goals. Use it regularly and make the most of its features to simplify your daily tasks and stay organized.
